## Installation

1. Park the tractor on a flat surface, place the control levers in the park brake position, shut-off engine and remove ignition switch key.
2. Unbolt the steering levers from the steering arms.
3. Attach the steering arm extensions to each of the steering arms.  
**NOTE:** The extensions can be attached to either the upper or lower set of holes in the steering arms.
4. Attach the steering levers to the steering arm extensions.  
**NOTE:** The steering levers can be attached to either the upper or lower set of holes in the extensions.
5. Adjust the steering levers to the operator's preference.
6. The tractor is now ready to operate.
