

PROCOLOUR SENSOR

State-of-the-art technology, instant colour matching and automatically generated colour harmonies – This is quite possibly the worlds smartest colour pocket sensor

Calibration ...

The beauty of calibrating the Lucas ProColour sensor is that, quite simply, you don't.

All sensors are pre-calibrated after manufacture using proprietary lab calibration methods for maximum accuracy.

Traditional colour calibration cards can fade or discolour due to surface debris resulting in an inaccurate benchmark and severely swayed data.

Your sensor will be ready to go straight out of the box!

UNPACK & CHECK THE CONTENTS

Make sure your box contains the Lucas **PROCOLOUR**, charging cable, and lanyard.

WAKE UP YOUR PROCOLOUR

The **PROCOLOUR** arrives in a "sleeping" state. Wake it by plugging it in to any standard charger.

LAUNCH THE APP & CONNECT YOUR DEVICE

Download the Lucas **PROCOLOUR** app from lucasteamstore.com/apps. Launch the app and connect your **PROCOLOUR**.

START SCANNING

Place your **PROCOLOUR** on any surface and start scanning! Remember to keep the device flush with surface for accurate results.

Technical Details ...

PATENTED DESIGN

The patented shape of the sensor blocks out all ambient light, providing superior accuracy in any setting. The unique design also allows for comfortable use and precise sensor placement.

FULL SPECTRUM LEDS

Integrated high CRI white LEDs provide a consistent light source for every scan.

IOS, ANDROID & PC

Compatible with iOS 8.0 or newer and Android 4.4 KitKat or newer running Bluetooth 4.0 Low Energy.

LIGHTWEIGHT & COMPACT

Weighing in at well under an ounce, and smaller than a ping-pong ball, the ProColour sensor is built for maximum portability.

RECHARGEABLE BATTERY

Battery life of over 3,000 scans per charge using the integrated rechargeable lithium polymer battery.

SOLID STATE TECHNOLOGY

Completely solid-state technology means that the ProColour sensor is extremely durable and fit for even the toughest of environments.

FAQ's & Support ...

Is my device compatible with the PROCOLOUR?

The PROCOLOUR is compatible with iOS (8.0 or newer) and Android (4.4 KitKat or newer) with Bluetooth 4.0.

I've tried everything and my PROCOLOUR won't connect. What do I do?

There is a small hole in the top of the PROCOLOUR lid. Use a paperclip to gently press the reset button.

How do I connect my PROCOLOUR to a different smartphone device?

Open the PROCOLOUR App using your current smartphone device and navigate to the top menu. Tap the disconnect option.

Have a problem? Call the manufacturer for direct support ...
