For a Clean, Clear and Healthy Ecosystem – Pond Biologics®

Bio-Clear™ LQ Natural Water Clarifier is a custom blend of highly concentrated natural bacteria and enzymes designed specifically to reduce organic debris in lakes, ponds and lagoons. Bio-Clear™ LQ effectively reduces organic waste and can be safely applied to waters that are used for recreation, fishing, irrigation and other activities.

DIRECTIONS

Bio-Clear™ can be applied to water temperature as low as 38°F (3.3°C). For optimal results start early in the season and apply on a once per month basis.

Directions for Use: Shake well before use. Mix Bio-Clear™ LQ in a separate container with pond/lake water. Apply from a sprayer across the surface of the water body. Bio-Clear™ LQ will spread throughout the water body on its own, attacking suspended organic debris and sediment (muck). **Do not allow to freeze.**

Calculation for surface acres of water:

$$\frac{\text{Length} \times \text{Width}}{43,560} = \text{Surface Acres}$$

Dosage Rate:

Apply Bio-Clear™ LQ once per month.

1/4 Acre Pond - 1 quart	3/4 Acre Pond - 3 quarts
1/2 Acre Pond - 2 quarts	1 Acre Pond - 1 gallon
