For a Clean, Clear and Healthy Ecosystem – Pond Biologics®

Bio-Clear™ Natural Water Clarifier is a custom blend of highly concentrated natural bacteria and enzymes, packaged in an easy to use water-soluble toss pack, designed specifically to reduce suspended organic debris in lakes, ponds and lagoons. Bio-Clear™ effectively clarifies water and can be safely applied to waters that are used for recreation, fishing, irrigation and other activities.

DIRECTIONS

HOW TO APPLY: Bio-Clear™ can be applied to water temperature as low as 38°F (3.3°C). For optimal results start early in the season and apply on an every two week basis.

If the pond or lake has an Aeration System or Floating Fountain, Bio-Clear™ can be applied on a once per month basis due to the higher dissolved oxygen content in the water which assists Bio-Clear™ function.

Do not open individual packets. Simply toss Bio-Clear™ water-soluble packets into multiple spots within your water body. Bacteria will effectively move through the water on its own.

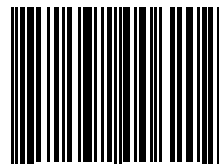

Calculation for surface acres of water:

$$\frac{\text{Length x Width}}{43,560} = \text{Surface Acres}$$

Dosage Chart	Application Rate	# of Packets
Initial Treatment:	3 pounds per surface acre	6 packets
Maintenance Treatment:	1 pound per surface acre every 2-4 weeks.	2 packets
