

# COLD WEATHER BENEFICIAL BACTERIA

**Pond Biologics® Cold Weather Beneficial Bacteria is a highly concentrated blend of psychrophilic (cold loving) bacteria that cleans and protects your pond during the colder months. Apply to any water temperature under 50° F**

- ✓ Accelerates the breakdown process of all organic waste
- ✓ Naturally recycles organic debris reducing sediment accumulation
- ✓ Reduces algae feeding nutrients
- ✓ Promotes cleaner water for a healthier ecosystem
- ✓ For use in water temperatures above 50° F
- ✓ Eliminates noxious odors cause by dead algae and fish waste
- ✓ Environmentally friendly. Safe for all fish, wildlife, plants and humans
- ✓ Includes a measuring scoop for easier application
- ✓ Easy to use dry powder mix

#### Application Rate:

Apply treatment every two weeks. Sprinkle Pond Biologics® Cold Weather Bacteria directly onto the surface of the water.

Approximately 17 scoops per container. One 16 oz container treats 42,500 gallons of water.

1 Scoop	Treats up to 2,500 gal of water	3 Scoops	Treats up to 7,500 gal of water
2 Scoops	Treats up to 5,000 gal of water	4 Scoops	Treats up to 10,000 gal of water
