

Using Your SodaKING Machine

**Thank you for purchasing a SodaKING Sparkling Water Machine
and supporting an Australian-owned company!**

Here's a quick guide to making the perfect sparkling water.

1. Fill the SodaKING reusable bottle with cold water* to the fill-line, located approximately 5cm down from the neck of the bottle. Chilled water works best, as carbonation is more efficient when the water is cold.

HINT: Keeping a reusable SodaKING bottle full of water in the fridge means you will always have cold water ready. Do not place bottle in the freezer.

2. Screw the reusable bottle into your SodaKING Sparkling Water Machine firmly.
3. Press the carbonation button once **FIRMLY**, for about 1 second only, then wait 3-5 seconds. If you prefer your water to be *bubblier*, repeat this process until the desired level of carbonation has been reached. You may hear the 'whoosh' of the pressure release valve. This is a normal part of the machine's operation.
4. When you are happy with level of carbonation, tilt the bottle forward to release the pressure. (You will hear the pressure release.) Wait a further 3-5 seconds before removing the reusable bottle from the SodaKING Sparkling Water Machine.
5. It's time to enjoy your sparkling water, or **gently** add flavours or fruit to your sparkling water.

* Please be aware that your SodaKING Sparkling Water Machine is only to be used to carbonate water. All fruit, flavours and any other products must be added **AFTER** you have carbonated your water and removed the reusable bottle from the machine. **If you carbonate any liquid other than water your warranty will be void.**

When your gas cylinder is empty, refer to www.sodaking.com.au for your nearest exchange location.

"What's the little black ring?", you ask. Every SodaKING Sparkling Water Machine comes with a rubber ring **already in place** that seals the surface between the cylinder and the machine. We provide a spare in the event yours becomes damaged or is missing.

Handy Hints:

For best results use chilled water. Never wash your reusable bottle with hot water or put it in the dishwasher. To clean just rinse with lukewarm or cold soapy water.

Having a problem?

Don't waste your precious time returning to the store you bought your machine from.

Just give us a call on **Ph. (03) 9081 7600** or email us at support@sodaking.com.au.

Customer service is a high priority at SodaKING, so give us a call or email and we'll help you.
