

SERAC CX MUD TUBELESS

SUPERIOR GRIP IN WET, MUDDY, CONDITIONS

Designed to conquer the nastiest wet cyclocross courses, the **SERAC CX Mud** has a tread pattern similar to the CX, but re-engineered specifically to maintain traction and cornering ability in mud.

The **X-Guard** version adds a 40x40 TPI double-layer bead-to-bead puncture barrier for incredible durability.

Wide cross-section for lower rolling resistance

inner-air-seal prevents leakage

Tread pattern specially designed for grip & cornering in the mud

X-Guard puncture protection layer (optional)

TYPE	IRC NO.	SIZE	BEAD	WEIGHT
NORMAL	19048K	700x32C	HYBRID	380g
X-GUARD	19048T	700x32C	HYBRID	435g
