

Thank you for purchasing our Nicebuys 210/310L Round Water Tank

PLEASE NOTE:

To fit lid into position, first time

We recommend two people fit the lid to the top of tank. The lid may not be 100% flat and will be much easier to lock into position with two people. Once fitted it will flatten.

Standing on opposite sides of the tank, position lid so the 3 catch pins sit directly above the circle of the key-hole slots in the top of the tank.

Push down gently and twist slightly in a clockwise direction to lock lid in place. Do not use excessive force as doing so may cause damage to the catch pins.

Fitting the tap to the tank

Hole for the tap has not been predrilled. A 25mm spade bit will be needed for this.

At the bottom of the tank there is a circular mark moulded into tank. Use this as a guide to locate tap. Please note you do not have to use this position, it is only a guide.

IMPORTANT – A base or stand for the tank should be used to allow space under tap for bucket or container. Tap can be placed higher on tank however this will reduce water capacity. *Check position before drilling hole for tap.*

Push or twist tap into hole and secure with nut provided inside tank. Do not overtighten. Tap washer should be on outside of tank.

*Any questions please call **0800 264 232** or email us at sales@nicebuys.co.nz during our business hours 9.00am - 4.30pm Mon - Fri.*
