# Innovation Through Colours

Sharing knowledge of new processes and new colours that help our customers stay at the cutting edge of their industries.

Univar Solutions Colour can produce an infinite number of shades in powder and liquid forms, as well as colours dispersed onto specific substrates.

New vibrant colours and solutions to meet your needs and market trends!

## **Product awareness, design and legislation:**

- Advice on improving your product design to get maximum performance and ensuring that you meet local and global requirements.

## **The right colour for the right application with the most powerful colouring power:**

- Bespoke colour designed for you with our technical team.
- Right fineness of our products made in the plant.
- No streaking and specking in final products and reduce the complexity to use colours in your plant.

## **Sampling and production trials:**

- Aid in scaling up from lab to factory.
- Production optimisation and improvements.

---

# Blending

## Bespoke colours:

In our colour laboratories we can create custom colours and specific shades to match your requirements.

Colour/particle size controls, micro testing and/or irradiation are performed when required.

## Powder:

- **Compounding with your ingredients** - Handling powders can sometimes cause contamination problems. We can blend the powdered colours with your primary ingredients to help solve this problem.
- **Speckfree colours** - Synthetic dyes specially blended to eliminate specking.
- **Water dispersible colours**

## Liquid:

- **Ready to use pastes** - Colour pigments dispersed into liquid bases.
- **Inks** - Specially formulated for printing and/or painting on to ingestible products.
- **Compounding with your ingredients** - Handling liquids can sometimes cause dosing problems. Univar Solutions Colour can blend the liquid colours with your primary ingredients to help solve this problem.

# Cosmetic Colour Range

- **Standard dyes and pigments (“straight colours”)**
  - Water or Oil soluble dyes
  - Lakes
  - Iron Oxides
  - Ultramarines
  - TiO<sub>2</sub>
- **Fine and ready to use dispersions/blends**
- **A wealth of “technical solutions” answering all issues and questions**  
Support from our application laboratories to match consumer needs and market trends.
- **Bespoke packaging**  
Products can be supplied in any pack size from 20g upwards.  
Pre-weighed to customers dosing requirements.

## Trending Now

Demand for hand wash and sanitiser is currently at an unprecedented level and colour has a key role to play in enhancing the sensorial aspect.

The most popular shades from our colour portfolio are blue, pink, yellow and green. You can see our full range on page five. FD&C colours for hand wash are available on page six.

In addition to the straight dyes that we can offer, we are able to blend colours to achieve custom shades for each application.
