

ADJUSTABLE JAMMER ARMS™

Sorinex Jammer Arms are comprised of the highest quality American Made components and hardware to ensure maximal user experience. Bronze bushings, steel washers, and cold-rolled steel bolts guarantee longevity and sustained usability. Locking compression arms, adjustable rotation pins, bronze bushings, and high-grade rolling stabilizers create a rigid and secure attachment point for maximal user experience and safety. No slop or unwanted movement.

Until now, all rack attached products or tools have been fixed via welds or bolt-on attachment points. This solution creates a modular option for all attachments and accessories via the Patent Pending adjustable technology. Unlock the full potential and versatility of Jammer Arms with upper and lower body movements. Press, pull, rotate, stand or sit to maximize the capabilities of your rack with industry-leading options per square foot.
