

1.5" DACRON CONDITIONING ROPE

BENEFITS

These extra-strength Black Dacron Ropes feature hand-dipped polymer ends along with whipped tail construction for maximum durability (whipped and dipped). The 1.5" diameter is a great scale from the 2.0" rope. Dacron material has a smooth texture, making it great on the hands for rope slams. It's also of the highest quality to prevent ripping, tearing, and fraying while performing rope climbs.

LENGTH	WEIGHT	DIAMETER	COLOR	MATERIAL
50 ft or 100 ft	11-52 lbs	1.5"	Black	Dacron
