

INERTIA WAVE

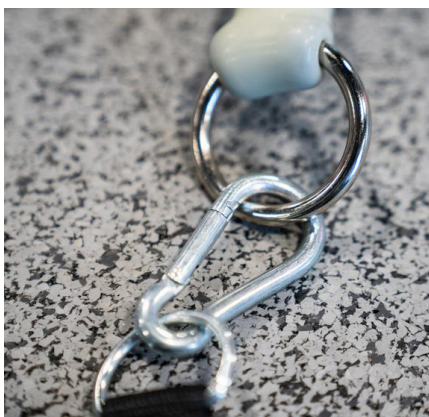

With its versatile anchoring system, you can work out anywhere, anytime and attach it anywhere you go. On fences, trees, benches, weight stations, even in the trunk of your car, just attach it and start waving. This single-person device is fully optimized for ease-of-use and to deliver the most intense HIIT workout of your life. The Inertia Wave is built with a solid steel, double reinforced O-ring on the anchoring end. That, along with the durable nylon rail strap and carabiner can withstand up to 600lbs of torque allowing you to wave hard without worry.
