

# LAT PULL - LOW ROW

A super duty, oversized, seated lat pull-low row apparatus with an unbreakable 300 LB or 400 LB selectorized weight stack to accommodate athletes up to 7' tall. Adjustable band attachment points add an additional resistance option to the weight stack. Attach the lat pulldown to your Base Camp rack, XL Series rack/rig, Iron Bear™ storage unit, or high bridge using our 4-way hole design. Unlike other lat machines that use a one cable system that increases the load ratio to make the weight feel lighter, our lat pull-low row features a dual connection point cable system to maintain a 1:1 load ratio. Premium upholstery and logo options make this machine the most versatile unit on the market.
