

MEGABRIDGE™

Connect your racks with a custom Megabridge to create a unique functional and branding element in your facility. Go vertical and add versatility to your floor space by adding monkey bars, gymnastic rings, dip / chin ballpins, knurled chin bars, rock climbing boards, or other Sorinex attachments. The Megabridge is a one-of-a-kind solution that will function exactly how you need it. The University of Tennessee Jumbotron Megabridge (right) was made to dual function as an educational area for presentations, seminars, videos, product demonstrations, and team education, as well as a training space.
