

SAWTOOTH ISOMETRIC ATTACHMENT

The Sorinex Sawtooth Isometric Attachment is a modular training and testing attachment. It is designed to be used in conjunction with your existing barbells for a simplified isometric solution. Originally designed in the mid-2000s, the Sawtooth Isometric Attachment securely attaches to your Full or Half Safety Bars. The Sawtooth design allows for 1/4" increment adjustments while the Spotter Bars adjust in 2" increments.
