

TRIGGER ROLLER

DESCRIPTION

Allowing you to tack, floss, dig, roll and release soft tissue injuries and inflammation. An industry first for rack attachments. Differs from lacrosse ball by providing the ability to increase or decrease pressure on body part without having to lay on the floor, plank or chase dropped balls around the room. By using the Trigger Roller in standing position, you can apply maximum pressure for self-myofascial release, or go lightly for pre-training mobility work. Double wheel lets you vary pressure even more while working around joints and bony appendages. Attach to the front, rear, inside or outside of the Base Camp, XL Series, and Dark Horse Racks for variable function and storage. Allow more athletes than ever to train at one station, increasing the carrying capacity of your facility. The configurations and adjustments are endless. Limited only by lack of creativity. The Sorinex Trigger Roller utilize our industry First 4-Way Hole Design allowing all bars, brackets, and add-ons to be secured in any direction front to back or side to side. The Sorinex Trigger Roller post goes all the way through the rack for the utmost security. Thus a new proven concept, room for constant growth, change and efficient training time.

FEATURES

- Black Urethane Wheels (11)
- ABEC Bearings
- Fits 3x3" Rack Sides w/ 1" Holes
- Made of 11 Gauge American Steel, Urethane Rubber and Durable Plastic
- 3" Steel Ball Backer
- Store Vertically or Horizontally

LENGTH	WIDTH	HEIGHT	WEIGHT
12"	3"	3"	1 lb.
