THE STEADICAM STEADIMATE-S

The Steadimate-S converts a handheld motorized gimbal into a full body-worn stabilizer system by attaching a mechanical gimbal collar/yoke and weighted base to the post of the gimbal. This allows a spring arm and vest to connect and assist the stabilizer, greatly improving the overall functionality and reducing operator fatigue.

The Steadicam arm reduces vertical bounce by providing z-axis stabilization, while the Steadicam vest provides operator comfort for long shots and long days by comfortably transferring all the weight across your torso and hips.
