Gel Polish Guide

What you need:

- Lint free pad • Isoprophyl Alcohol • Cuticle Pusher
- 180 Grit File • Nail Buffer • Duster • Primer • Base Coat • Gel Colour • Top Coat • Nail Lamp • Cuticle Oil

1. Prep the nail
2. Apply Kiki London Primer and leave to dry for 10 seconds
3. Apply a nice thin layer of Kiki London base coat, making sure not to flood the cuticle
4. Cure base coat for 30 secs in LED lamp (or 1 min in UV lamp)
5. Apply thin, even layer of colour and making sure to cap the free edge
6. Cure first coat for 30 secs in LED lamp (or 1 min in UV lamp)
7. Apply second layer of colour and cure for 30 secs in LED lamp (or 1 min in UV lamp)
8. Apply thin coat of Kiki London Top coat, making sure to take time and cover the whole nail and capping the free edge
9. Wipe off sticky layer with a lint free pad and isoprophyl alcohol (Skip this step if you've used Kiki London No Wipe Top Coat)
10. Apply cuticle oil to replenish the oils in the finger

Please be advised that these recommended curing times are based on usage of our Kiki London 96W Deluxe Nail Lamps
