

see what Delta can do™

UNIVERSAL
DESIGN
SOLUTIONS

Beautiful design has rarely been so accessible.

The Delta® brand design philosophy is driven by interaction. We combine thoughtful, beautiful design with stability and other features that allow for the independence of people of all ages and abilities. Through this, we're making water more accessible, enjoyable and transformative for everyone.

Our innovative technologies are designed to provide additional convenience. With options that include Touch2O®, Touch2O.xt® and Proximity® Sensing Technologies, and MagnaTite® Docking, we're making beautiful products that serve even greater functions.

Saving water—one faucet at a time.

We believe universal design also means making water more accessible to everyone—and that means saving more of it. Our partnership with the EPA WaterSense® Program helps protect and conserve our nation's water supply. We were honored to be named as WaterSense Manufacturer Partner of the Year in 2011, 2013 and 2014, and as a WaterSense Sustained Excellence Award Winner in 2015 and again in 2016.

Innovations that open a world of possibilities.

Touch2O® and Touch2O.xt® Technologies.

Sometimes, their hands could use a hand. Touch2O Technology starts water flowing with a light tap anywhere on the spout or handle. Touch2O.xt Technology starts the water when hands get within four inches of the product, and stops when hands are removed. Both technologies offer convenience while being ADA-compliant.

Proximity® Sensing Technology.

The next generation in hands-free functionality. Proximity Sensing Technology makes Delta® electronic faucets the most responsive in the industry. The entire faucet body acts as a sensor, activating water flow when users approach and stopping once their hands are removed. And the lack of an exposed sensor reduces the risk of sensor damage from vandalism or cleaning products.

MagnaTite® Docking.

Stays put every time. With its powerful integrated magnet, Delta MagnaTite Docking snaps spray wands precisely into place for easy, smooth docking every time. The firm hold of the magnet prevents drooping for a lasting picture-perfect look, but comes free with a gentle tug.

Temp2O® Technology.

Take the guesswork out before they get in. Handshowers, showerheads, and tub and shower fixtures equipped with our Temp2O Technology show bathers the temperature of a shower or bath before they get in. A built-in color indicator changes from blue to magenta to red—letting them know at a glance when the water is safe and comfortable.

Watch for these icons:

 = DIAMOND™ Seal Technology

 = InnoFlex® PEX Waterways

 = H2Optics® Sensing Technology

Our designs are accessible. Because talent in the kitchen knows no bounds.

Combining our designs with our innovative technologies creates kitchens that are beautiful, convenient and accessible to anyone. Available in a wide variety of styles and finishes, there's a fit that suits a variety of needs on every level.

We lead our industry in identifying and meeting consumer needs—creating new styles and finishes for faucets and accessories, and inventing innovative technologies that capture clients' imaginations.
