Dear Nayyar,

APPROVAL OF DAIRY MAINTENANCE COMPOUND

The product **Vinyl & Rubber Restorer** has been considered in conjunction with the independent assessment reports provided and determined to satisfy the requirements of clause 30(3) of the Animal Products (Dairy) Regulations 2005 when used in accordance with the label.

This approval of the compound is subject to the following conditions:

1. To be used in accordance with label instructions.
2. Must not be used on milk contact surfaces.
3. Should incidental contact with milk contact occur then the surfaces must be thoroughly cleaned and rinsed to ensure no residue remains.

Where this **approval** is stated on the product label, the statement "MPI approved for use in farm dairies" is to be used unless an alternative is agreed in writing by MPI.

Should this product be determined to be unsatisfactory when used as per the label or as per any recommendation provided by the manufacturer or an agent of the manufacturer, MPI may amend or withdraw this approval.

Review

This approval is valid for a maximum period of 5 years but is subject to periodic review and may be withdrawn at any time should the Director-General determine that there is sufficient evidence that the products are not fit for the purpose for which this approval applies. You will be issued a letter prior to the review date, which is set at **July 2022** but you are responsible for ensuring that this review is completed if you wish to retain MPI approval of the above dairy maintenance compound.

Yours faithfully

Maree Zinzley
Manager (Approvals Operations)
Ministry for Primary Industries
