

StarDeck®

Exterior Decking Screw

- ▶ **No Pre-drilling**
- ▶ **Superior Holding Power**
- ▶ **50% Less Drive-in Torque Required**
- ▶ **Exceptional Corrosion Resistance**

Extreme Performance

The award winning **StarDeck** is probably the most efficient weather resistant, exterior screw available. The patented Starform™ thread provides up to 50% lower drive-in torque, enabling quicker assembly times with exceptional holding power – all without pre-drilling!

With a Stardrive™ recess, partial thread and sizes from 50mm to 100mm long, the **StarDeck** is the ultimate fixing for all exterior timber.

Long Life – No Staining

High tech Starcoat™ protection extends corrosion resistance in the toughest environments, including ACQ (alkaline copper quaternary) and other treated timber.

Quick Start

Sharp point for a quick start, rapidly penetrating into all wood types, including hardwood, treated softwood or wood composites.

Safe

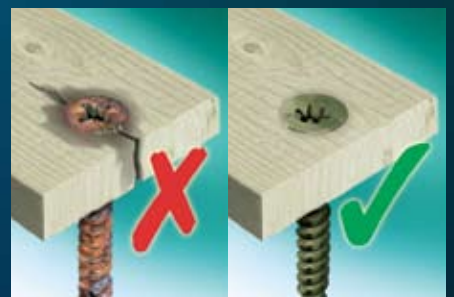

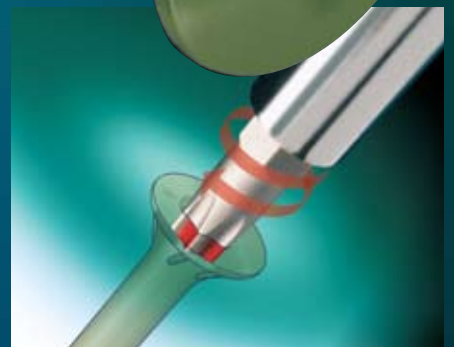

The precision Stardrive™ recess improves grip when using power tools and drives into even the hardest wood, without mechanical damage.

No Splitting

The patented Starform™ thread lowers torque and reduces wood splitting.

Flush Finish

The ribbed countersunk bugle head sinks into all timber ensuring a flush finish – effortlessly.

StarDeck® Exterior Decking Screw Product Information

The **StarDeck** decking screw is fast starting and cuts a receiving thread into timber rather than simply displacing material, virtually eliminating the risk of splitting – even close to the edges of the timber

There is no need to pre-drill, even into hardwood and the deep star drive recess provides a positive engagement with the screwdriver bit, reducing the possibility of mechanical damage to the coating. The partial thread increases pull-in power between the timbers making a tighter fit and reducing 'Jacking', where a full threaded screw tends to pull apart the jointed material.

StarDeck decking screws have triple layer corrosion protection. A high performance ceramic top coating is applied giving **StarDeck** excellent corrosion resistance, exceeding 500 hours when salt spray tested in accordance with ISO 9227:2012.

The small bugle head along with under head ribs are designed to present minimal appearance in the finished product. Semi-matt green finish also blends with treated timber, providing a neat, flush and unobtrusive finish.
