

A black metal French cleat bracket is mounted on a brown cardboard surface. The bracket is L-shaped with two sets of mounting holes on the short ends. A small, dark logo is visible on the vertical part of the bracket. The cardboard surface is bordered by a thick, white, braided rope. The background shows a red brick wall and green plants.

Installation Instructions

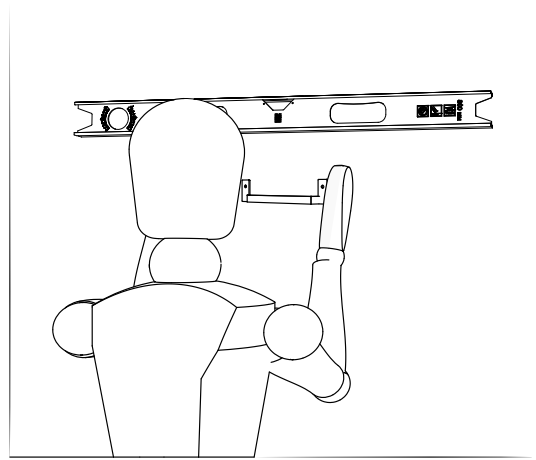

Picture I

2

Once the wall where you will install your piece is clear, measure the location of your piece and make a mark. Once marked, use the **Wall Cleat**, a level, and a pencil to mark the corners and screw holes.

1

Upon receiving the box, it is important to check that it is placed face up. Remove the piece and place it on a clean surface.

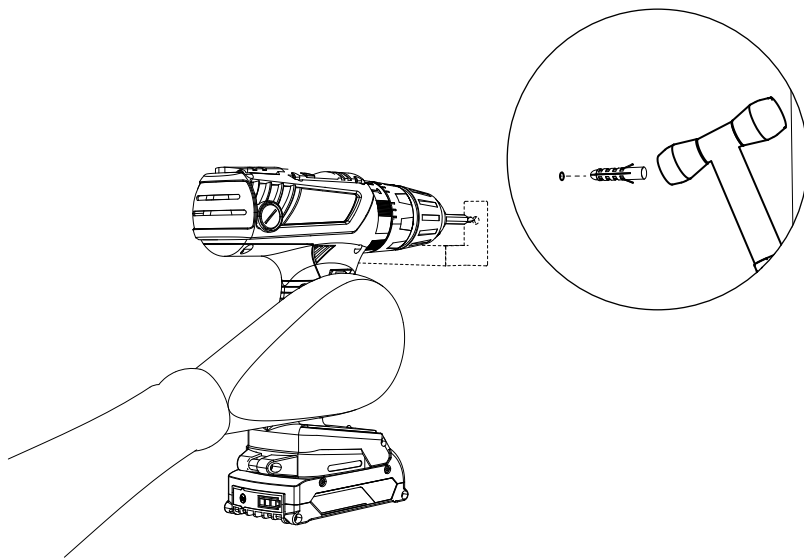

Picture II

3

Hold the drill firmly and drill the holes previously marked with the depth of the anchors.

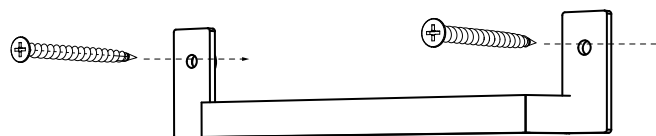

Proceed to insert the anchors into the holes. Use a hammer if necessary

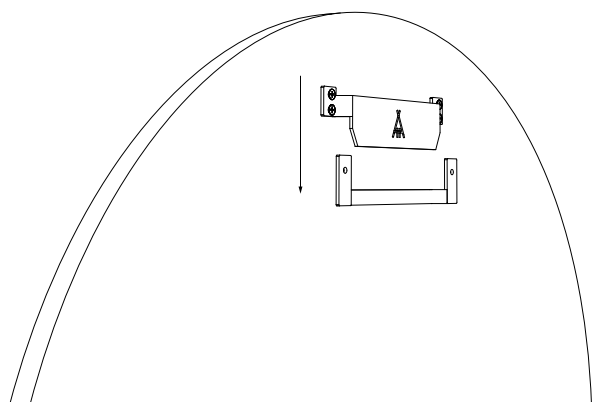

Picture III

4

Overlap the **Wall Cleat** using the drill, drive in the screw to hold the bracket.

Picture iv

Picture v

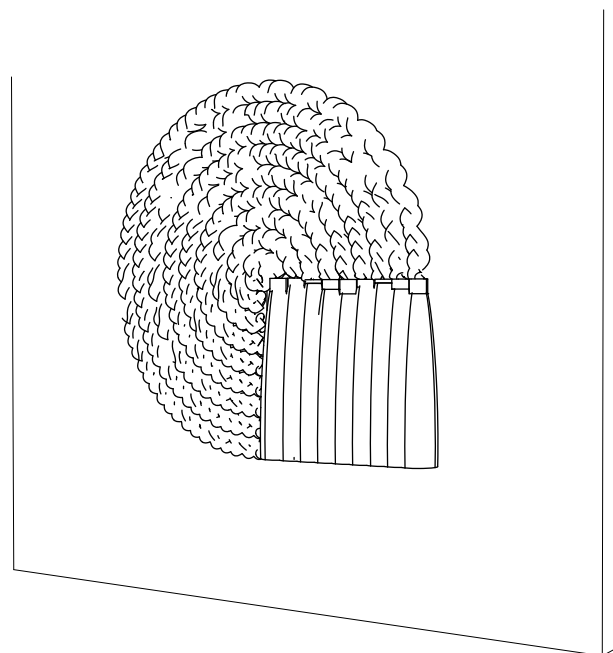

6

Using a wide-bristle brush, brush the cotton to add volume and remove any potential imperfections in the thread.

And your Caralarga is ready!

5

Once the **Wall Cleat** is installed, load the piece (if necessary, with the help of one or more people) and connect the **Wall Cleat** to the **Cleat**.

Care Recomendatios

The Caralarga pieces are made with natural materials and fiber which requires special care maintenance.

Remove the piece from its box within a maximum period of 5 days upon reception.

Install the piece out of direct sunlight and keep away from humidity.

Brush the cotton threads with a wide tooth comb or brush at least every six months.

To clean the piece or remove dust, use a clean and dry cloth.

Carefully vacuum the piece every four months to remove any dust that may accumulate.
