Company Introduction

BIOARA a global standard in the research and development of Cordyceps Militaris, a center of research and development of new Cordyceps varieties in Korea.

In our own farm, which is strictly managed producing and selling our new varieties (Ara 301) applied for the Korea Seed & Variety Service. Currently, our company produces and supplies about 70% of the domestic market for Cordyceps raw materials.

The reason why Cordyceps is good for the body is because of Cordycepin, a component found only in Cordyceps. Our new variety Cordyceps(Ara301)contains Cordycepin, Adenosine, and Beta-glucan as its main active ingredients. It contains the most β -glucan among mushrooms kinds.

Bonchow Cordyceps use the new variety Cordyceps developed through long research and development of Cordyceps Militaris strain collected in Korea. It is a premium fermented Cordyceps product with a high absorption rate of Cordycepin, Adenosine, and Beta-glucan extracted from Cordyceps through Bioara's specialized fermentation method.

mg/kg ARA 301 Paecilomyces japonica
CORDYCEPIN 9160 Less than 30.0
ADENOSINE 1130 585~608

Main Item Categories

Cordyceps Militaris Processed Food (drinks, dried mushrooms)

■ Product Details

BONCHOWI Fermented Extract (Red)

Food › Food › Beverages/Liquor

* SIZE: 20ml * 30 ea (600ml) / 274 * 194 * 60mm / 1.2kg

* Features

- The main products of Bioara's Premium Cordyceps brand 'BONCHOWI'
- Fermented Cordyceps extract 33,5%
- For people of all ages (starting from the age that can eat regular food), 1 ~ 3 pouches recommended a day
- Being sold at local Vietnamese BONCHOWI specialized shops (although it is very expensive in Vietnam, the Vietnamese BONCHOWI market is very active)

* Competitiveness

1. Among the 5 varieties of Cordyceps protected by the Korea Seed & Variety Service, there are two varieties that can be exported. One of them is 'Ara 301', which is the raw material of 'BONCHOWI'
2. Stable cultivation and raw material supply of the highest content of the main ingredient, Cordyceps Militaris, which is not polluted with any heavy metals or bacteria through our own smart farm based on patented IoT technology
3. We possess patented technology of hot water extraction of Cordyceps, the first fermentation technology in Korea and manufacturing and processing technologies that maximize absorption rate
4. Using the fermented Cordyceps extract, which is the main raw material, does not mix low-cost Cordyceps(Paecilomyces Japonica) but only uses Cordyceps Militaris 100 percent(Using only the top 5% of the Cordyceps Militaris grown in our farm)
5. In order to purify the unique taste of Cordyceps, we use fruits such as pear, persimmon, and quince without adding artificial additives. Its sweet and soft taste eliminates prejudice that health foods are bitter and unpleasant, making it popular among all ages. At this Anaheim Natural Food Exhibition, it received a high reputation for taste, regardless of age, gender, or race.
6. Cordycepin content of 1.9mg as domestic health functional standard
7. Pouch type; easy to eat, store and carry
8. Brand protection with registration of design, seal and trademark

FOB Price **100 USD**

M.O.Q. **100(Unit price can be negotiated according to order quantity)**
