Company Introduction

The new beginning, new possibility, and the new future begin with Poket Dream

All the things of Poket Dream are always new because the products are smaller, lighter, freer and more convenient. We will challenge new possibilities and create the new future.

We bring flexibility to your life. Pocket Dream develops kitchen and camping appliances based on new ideas to enhance your life. Through innovative technologies, we will develop smaller, lighter and more convenient products.

Business

Our goal is to bring the best products to the world. We create new dining and camping culture by investing in new possibilities for new products.

Since our inception, we have continued to bring the best products to you through multiple tests and upgrades. We seek to produce kitchen and camping appliances that are 1mm thick and weigh only 1g.

We will not rest on our laurels.

Pocket Dream will not become complacent. With the aim of producing products that are better than those of world renowned companies, we have gone through tests after tests to develop our own products since our inception in 2014. We will continue to produce the world's best products.

We are still at our early stage but bringing happiness into your homes is the foundation of our philosophy.

Removable Handle : Our detachable handle is firm, heat resistant and can be fixed on to the pan in a second.

Kitchen : We have developed a pot that you can use as a container to store food in the refrigerator and we are also currently working on various other new products such as vacuum pots.

Camping : Portable camping cookware set are convenient for storage and to carry for traveling. You can even use the lid as a plate. We are developing new products such as camping tents, tables and burners to create a more enjoyable and convenient camping experience for you.

Main Products

Pots (Dream-Zzi2.3) : All 3-PLY 5pots set product components

Easy to store filled pot in the refrigerator Easy to store on the small table by piling. All 3-PLY pots : Combines the advantages of stainless steel and lightweight aluminum with high thermal conductivity of three layers IH It can be used for the cooking devices for all heat sources such as induction, halogen, as well as all gas heated.

Portable pots (Poket-ProH) : Camping for a family of four & kitchen for single-person households. THE STATE THAT LIDS ARE USED AND STORED : Innovation that the storage height just increased by 2.4mm even though 3 lids are accumulated Lids can be used as plates when you need them and lids when you need them!

Combines the advantages of stainless steel and lightweight aluminum with high thermal conductivity of three layers IH It can be used for the cooking devices for all heat sources such as induction, halogen, as well as all gas heated. Removable

handle : The magic handle can attached or removed in a second but it never fall out. The products is easy to store by all removable handles.

Technology

Pocket Dream's detachable handle has received patent in Korea in 2015. Since then it has received Japanese, European, Canadian and Australian patent and has currently filed for patent application in the U.S., China, Vietnam, etc.
