#### COMPANY INTRODUCTION

average point

**3.75**

Rating Region

We, GI Electronics Co.,Ltd have been established since Jan. 01, 2000 and we are a manufacturer of hair dryer heaters and professional digital hair dryers in Korea.

We are producing 3 kinds of professional (digital) hair dryers and travel foldable hair dryers. Our product is a new type of hair dryer which is out of the form and function of the existing product. It has designed innovative design and electronic digital circuit, We have world-class patents in the form of functions and archiving. Especially, we applied digital motor application and digital circuit which have the strongest airflow in the world. Far infrared rays and natural anion function saved 70% of conventional hair dryer use time even though it was not dried by hot wind.

This is the original professional digital hair dryer that most professionals can use safely, eliminating the problem of most hair dryers failing power supply wires within a year or two. We are currently distributing to a group of professional hair design professionals in Korea and are very satisfied with our new designs and features that raise their pride.
