Certification of export	CE,RoHS,FTA(EU)

Airshot airpurifier

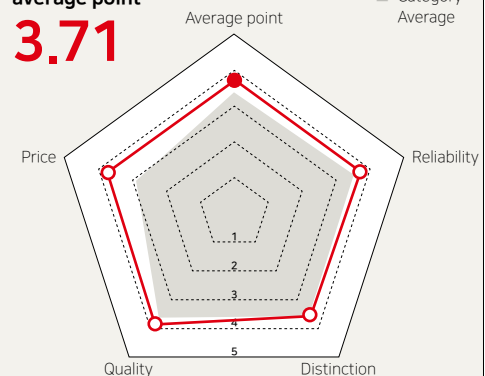

Air shot is a PCO based personal air purifier using eco-friendly UV LED and an edible pigment called TiO2 by the support of a government agency. We just started to export this personal air purifier to some countries like EU, HK, Jordan, etc. Unlike the conventional air purifier PCO based Air shot decomposes the pollutants in the air into harmless H2O and CO2. Also, there is no need of filter maintenace as both TiO2 and nano filters can be easily regenerated. Thanks to long lasting UV LED and german brand axial fan which have 40,000 hours, Air shot can be used up to 10 years based on 10 hour driving per day.

FOB Price	USD 30
M.O.Q.	1,000 pcs

COMPANY INTRODUCTION

average point

3.71

Rating Region

ACRO-SOLUTION is a start-up here in Korea and all members are from Seoul Semiconductor/ Seoul Viosys, the gloabl top 4 LED/UV LED manufacturer. Our main business is Acrich(AC LED) module for various lighting applications and we started UV LED module & finished product from 2017. Air shot, a personal air purifier is our first UV LED finished product and now it is being sold on various home shopping and on-line markets here in Korea.
