Company Introduction

STAR's Tech ECO-ST1 is an eco-friendly deicer made with predatory starfish, a marine bio-waste.

Our technology is the result and hardwork of scientists and developers from Seoul National University. Our eco-friendly product outperforms competitors and other materials used in removing snow, ice or frost from a surface. STAR's Tech ECO-ST1 offers the best comprehensive solution of competitive deicers that reduces significant infrastructure and personal property damage to concrete, metal and plant necrosis while providing outstanding deicing performance.

Main Item Categories

Eco-Friendly De-icer

Outstanding snow melting performance

- Our STAR's Tech ECO-ST1 product is up to 166% more effective when compared with sodium chlorides solutions for snow melting performance while providing a level of maintenance up to 3 times greater than calcium chlorides.

ZERO corrosion

- Our STAR's Tech ECO-ST1 boasts a major reduction in corrosion rate, close to 0%, at 0.8% corrosion, far exceeding the standard 30% corrosion rate required for an eco-friendly deicer.

PERFECT-ECO

- Our deicer with starfish extracts minimizes the damage to roadside trees and vegetation caused by chloride ions and reduces corrosion to infrastructure and personal property.

Solidification solved! Optimally designed for long-term storage

- With bead-shaped particles covered with a special coating, our product has solved the problem of solidification to enable prolonged storage while being dust-free.

Reuse of starfish, a marine bio-waste

- We make use of starfish, in the most efficient way: STAR's Tech develops an eco-friendly deicer utilizing starfish, a marine predator that causes multiple environmental problems.
