## OPERATING INSTRUCTIONS

This is a dual wind wristwatch. Wind it up by turning the crown clockwise. The movement is also self winding and will continue to wind itself while you are wearing it. The sound and feeling of the pendulum moving internally indicates that your time piece is operating normally.

To set time, pull the crown out and rotate clockwise to set hands. Push crown back in and watch will operate.

This watch is manufactured in accordance with MIL-PRF-46374G, Type II, Class 4. (Analog, antimagnetic, water-resistant, mechanical movement, battery not required.)
