

## Special Weekly Setting Instructions for use of your Tide Timer on the PACIFIC COAST OF THE USA, HAWAII, and CANADA

Due to the vastness of the Pacific Ocean, the regularity of the tides is less predictable. Schelling Corporation has formulated these custom copyrighted weekly setting tables for use with your Tide Timer in order to attain the most accurate readings possible from a Tide Clock.

**FOR ANY POTENTIALLY DANGEROUS SITUATION, YOU SHOULD RELY ONLY ON OFFICIALLY PUBLISHED TIDE TABLES AND YOUR OBSERVATIONS. TIDE CLOCKS ARE NOT SUITABLE FOR NAVIGATION!**

If you want to receive the maximum benefit from your Tide Timer, be sure to use our Pacific setting charts to adjust it. **Each Saturday**, you should reference the time of high or low tide indicated in the designated chart for your area and reset your Tide Timer as indicated. **Do not reset or adjust your Tide Timer again during the week.** You may notice that our setting times will be different from the published tide tables, and may vary an hour or more at times. Our special computer programs have developed special settings to provide you with the most balanced readings throughout the week. Thousands of users of our Tide Timers have found this variance fully acceptable. Remember, along the Pacific Coast, setting your Tide Clock by the official published tables will not give satisfactory results.

Schelling also supplies starting times for most of the major reference stations published by the US Department of Commerce for the Pacific Coast. If the reference station in your area is not included, you only need to determine your relationship to a reference station once, and your tides will always be the same variance from that station's time. For example, if the closest station to you is San Francisco and your high tide comes one hour before the high tide of San Francisco's (according to tables published on a website or newspapers or any nautical source), then it will always come one hour before the published time in San Francisco. Therefore, you should set your clock weekly to the time our chart says in San Francisco MINUS one hour. If our Table states that high tide is at 2pm, you should set your clock to high tide at 1pm. See below for the complete list of Pacific Coast station locations.

### PACIFIC COAST STATION LOCATIONS

#### ALASKA

Anchorage  
Juneau

#### CALIFORNIA

Arena Cove  
Crescent City  
Humboldt Bay  
Los Angeles  
Monterey  
Port Chicago  
Port San Luis  
San Diego
