

Measurement charts

- SHIRT -

Compare a garment you own with our size charts and use the instructions below.
Lay your garment flat when you measure. Please note actual garment sizes can vary +/- 1 cm.

How to measure

- A CHEST:** Measure straight across, 2,5 cm (1 in.) below where the bottom of the sleeve meets the body.
- B WAIST:** Measure straight across at the narrowest part of the garment. If no waist is defined, measure halfway between the armpit and the bottom of the shirt.
- C SLEEVE:** From the centre of the back of the neck, measure straight across to the outside edge of the shoulder, and then down the top of the sleeve to the bottom of the cuff.
- D COLLAR:** Measure from the outer edge of the buttonhole, along the inside of the collar, to the center of the button.
- E SHOULDER TO SHOULDER:** Measure straight across the front of the garment, from the outside edge of one shoulder (at the top of the sleeve) to the other.
- F LENGTH:** Measure straight down from the highest point of the shoulder (usually where the collar meets the body) to the bottom.
