

Jewelry Care Guide Checklist

- Store sterling silver in a cool, dry place, away from sunlight and moisture
- Keep sterling silver in an airtight container or a sealed plastic bag to prevent oxidation
- Use anti-tarnish strips or pouches in your storage container to absorb moisture and prevent tarnish
- Clean your sterling silver regularly with a soft cloth or a silver polishing cloth to remove any dirt or fingerprints
- Avoid exposing to harsh chemicals, including bleach, chlorine, soaps or ammonia
- Wear your silver often, as natural oils in your skin help prevent tarnish
- Remove your sterling silver before swimming or showering, as exposure to water and chemicals can tarnish
