

INSTRUCTION GUIDE

Commercial Uplighter

Model No. SLDIG-8W

PACKAGE CONTENTS

1. 1 x Light Fitting

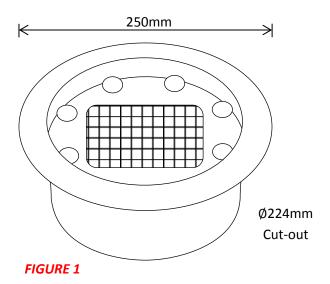

FEATURES

- 1. Built in Photo Electric Cell (Day/Night Sensor)
- 2. 6-8 hours Operation every day
- 3. Flush Mounting Position
- 4. Tempered Glass
- 5. Charging Time: 4 hours
- 6. Run Time: 6 hours

INSTALLATION METHOD

- 1. Remove contents from packaging
- Choose your desired installation location.
 Please ensure that you situate your fitting
 where it will receive maximum direct
 exposure to sunlight throughout the day.
- Locate the silver on/off switch on the back of your light and press once to activate.
 When the inner section of the on/off switch is depressed this indicates the on position.
- 4. Make a **Ø90mm** cut-out (ensuring you have a **120mm** surface diameter surrounding your cut-out) and install your light so that it sits flush (*FIGURE* 1)

IMPORTANT NOTES

- Please ensure you place your solar panel in a location where it can achieve a minimum of 4HRS DIRECT SUNLIGHT
- Be aware that on overcast/cloudy days, the solar panel will still charge. However, not as efficiently as a sunny day, so the battery may not reach full capacity. Therefore, your light may turn off earlier than specified.
- It's best not to install these lights underneath a street light, porch light etc. because this may stop the automatic day-night sensor triggering and result in your lights not turning on

TROUBLE SHOOTING

| Phenomenon | Cause | Inspection Method | Solution |
|---|---------------------------------------|---|--|
| Light won't turn on | Switch hasn't been turned on | Determine what position the switch is in | Turn the switch on |
| | Battery has run flat | Period of rainy or cloudy weather or installation site doesn't provide enough direct sunlight | Charge the light in direct sunlight for 1- 2 days then check again |
| The light only stays on for a short amount of time | Low Battery | Bad installation site for the solar panel Dust or leaves are covering the panel Long period of overcast weather | 1. Charge the battery in direct sunlight for 1-2 days with the switch off, then check again 2. Clean the solar panel |
| | Battery Failure | Access the light and & replace battery Battery has matured | Contact SLD Customer Service to buy new batteries |
