

# INSTRUCTION GUIDE

# **Residential Wall Light**

Model No. SLDWL228/BLK-WW. SLDWL228/SIL-WW

## **PACKAGE CONTENTS**

- 1. 1 x Light Fitting
- 1 x Pack of screws

### **FEATURES**

- Up & Down Lighting
- 2. Automatic Dusk to Dawn Operation
- 3. "ON/OFF" Switch
- 5. Powder Coated Finish

## 4. IP44 Waterproof Rating

## **INSTALLATION METHOD**

- 1. Remove contents from packaging
- 2. Decide where to mount your wall light (where the light will receive maximum direct sunlight throughout the day)

#### \*Please refer to FIGURE 1 below for steps\*

Step 1. Drill 2 holes in your chosen wall, making sure they are even, and the correct length apart (refer to FIGURE 2)

Step 2. Insert screws into the holes, making sure they are in tight and are sitting even.

Step 3. Locate the slots on the side of the wall light (Seen in FIGURE 2) and line them up with the screws.

Step 4. Simply slot the wall light into the screws and push down to secure and tighten.

## **IMPORTANT NOTES**

- Please ensure you place your Solar Panel in a location where it can achieve a minimum of 6hrs Direct Sunlight
- Be aware that with overcast/cloudy days, the solar panel will still charge. However, not as efficiently as a sunny day, so the battery may not reach full capacity. Therefore turning off earlier than specified.
- It's best not to install these lights underneath a street light, porch light etc. because this may stop the automatic daynight sensor triggering and result in your lights not turning on

## **TROUBLE SHOOTING**

Phenomen			
on	Cause	Inspection Method	Solution
Light won't turn on	Switch hasn't been turned on	Determine what position the switch is in	Turn the switch on
	Battery has run flat	Period of rainy or cloudy weather or installation site doesn't provide enough direct sunlight	Charge the light in direct sunlight for 1-2 days then check again
Short lighting time	Low Battery	<ol> <li>Bad installation site for the solar panel</li> <li>Dust or leaves are covering the panel</li> <li>Long period of overcast weather</li> </ol>	1. Charge the battery in direct sunlight for 1-2 days with switch off, then check again 2. Clean the solar panel
	Battery Failure	Access the light and     & replace battery     Battery has     matured	Contact SLD Customer Support us to buy new batteries
