

Dental Compounding

At The Compounding Pharmacy Australia, we offer a range of customised medications to assist dentists improve the outcome of dental treatments for patients. Providing alternate dosage forms like lollipops, dental bandage or gels are just some of the options available.

We offer the advantage of being able to compound viable medication options that have either been discontinued, are commercially unavailable or are totally individualised to specific treatment plan.

We compound medical preparations for the treatment of dry mouth, painful mouth ulcers, TMJ (Temporomandibular Joint Disorder) topical treatments or chemo-induced stomatitis, bacterial gum infection, oral thrush, alcohol free mouthwashes, intra or extra oral anaesthesia in different bases, teeth whitening agents and viral infections.

Call us on **1300 244 073 option 1** today for all your dental compounding solutions.
