

SURVIVING MOULD

Latest discovery of mould and how it effects one's body has grasped interest among the medical community. At T CPA we endeavor to keep up to date with the on trend treatments for CIRS.

CHRONIC INFLAMMATION RESPONSE SYNDROME (CIRS)

CIRS is a multi-system illness that causes widespread pronounced symptoms such as fatigue, memory and concentration problems, but there is typically widespread metabolic chaos. Following Dr Shoemaker's Protocol in surviving mould, we compound many medications and provide services including lifestyle and wholistic advice to patients.

For more information about the protocol, please visit:

https://www.survivingmold.com/docs/12_STEP_SHOEMAKER_PROTOCOL_FOR_CIRS.PDF

VIP NASAL SPRAY (VASOACTIVE INTESTINAL PEPTIDE 200MCG/ML) Rx

VIP is a neuroregulatory hormone with receptors in the hypothalamus which regulates peripheral cytokine responses, pulmonary artery pressures, and inflammatory responses throughout the body. In Mould illness patients, low VIP levels are present leading to shortness of breath and chronic watery diarrhea

CHOLESTYRAMINE (QUESTAN POWDER) Rx

Cholestyramine eliminate the smaller molecular size biotoxins.

BEG NASAL SPRAY (Bactroban (Mupirocin) 0.2%, Edetate Disodium (EDTA) 1%, Gentamicin 0.5%) Rx

The ingredients in BEG aim to rid MARCoNS (Multiple Antibiotic Resistant Coagulase Negative Staphylococci). MARCoNS increase cytokines, and lower T-reg cells resulting in chronic Fatigue symptoms of body aches and debilitating exhaustion.

VRINDAVAN MOULD SOLUTION SURFACE SPRAY

Made in Australia with pure clove essential oil to safely and naturally kill mould spores without the toxic fumes of bleach and chlorine. This fabulous mould solution is anti fungal, antiseptic, removes mould, attacks the spores and prevents regrowth.
