Motion/Daylight Sensor with Remote Control Compatibility: 0-10V microwave-based motion sensor with integral photocontrol, allowing for three output states: 100%; 10/20/30/50% output; or 0% output. Detection area, hold time, daylight threshold, and dimming level are configurable via DIP switches. At its maximum mounting height of 32 feet, the sensor can detect motion up to 30 feet away. Sensor mounted internally, behind lens.

A compatible remote control is available with the sensor, which allows for easy sensor configuration, reprogramming, and troubleshooting when necessary. Users should review supplementary motion sensor datasheets and the product instruction manual for detailed remote control programming and operation.

MOUNTING:

- Standard 3/4" NPT for pendant mounting (pendants by others)
- Standard adapter plate included for junction box mounting (junction boxes by others)
- Three side-mounted 1/2" NPT knockouts

PRODUCT DESCRIPTION:

Quick to install and pay for itself, the LED Low-Profile Canopy is the ideal retrofit solution for 150-250W HID garage and canopy luminaires. Offered in 30-, 40-, and 58-watt versions, with different lens options for parking garage and canopy distributions, the CPL can address a variety of canopy needs.

The series offers 0-10V dimming drivers standard with an optional integral microwave motion sensor to negate interference on light output. Consuming 75 percent less energy than incumbent fixtures, the CPL series provides immediate payback and long-term energy and maintenance cost savings.
