WHY CREATE A BETTER LEARNING ENVIRONMENT?

Across the country, kids and teachers are disconnected and disengaged.

The schools they come to every day just aren't equipped to serve students' individual learning styles.

Let's stop leaving teachers and students feeling disconnected from their work and from each other.

We believe you deserve a better learning environment.

With a collaborative classroom built by Kay-Twelve, your school can go from ineffective to innovative.

Teachers make the impact and connections they want to, and students are engaged and energized.

The Active Learning Space:

21st century learning, or active learning, provides students and teachers with what they need to meet today's demands, especially with STEAM subjects. A 21st century classroom should foster both solitary and communal work.

In order to get the most out of your space, follow our guide to creating a 21st century learning environment so that you can make the most out of your classroom!

Kay-Twelve's Guide For a Successful Learning Environment:

Step One: Visibility

Step Two: Adjustability

Step Three: Flexibility

Step Four: Collaborative

Step Five: Engaging

Step Six: Commodious

Step One: Visibility

Capturing students attention within the classroom is a main focus within 21st Century Learning. Many colors throughout the classroom can increase student engagement which is the first vital step within learning.

Step Two: Adjustability

It is important for your learning space to be accommodating for all students. Adjustable furniture within your space allows for just that while satisfying every student's comfort level throughout the learning day.

Step Three: Flexibility

Recent research has found that movement is linked to learning and retention. That is why transforming classrooms should promote continued movement which fosters an open mind to new information.

Step Four: Collaborative

The standard lecture style teaching is in the past. Working in groups is a primary focus within education today as students are able to learn at a higher level. That is why it is important for educational furniture to be designed for flexible group configurations.

Step Five: Engaging

When furniture can engage the body with the brain through individual motor skills, improved learning habits can be formed naturally. 21st Century school furniture can improve your learning experience while also positively impacting students long-term effects on happier muscles, healthier bodies, and hungrier minds.

Step Six: Commodious

A commodious classroom allows for less distraction as students can have more room to do their work. A spacious classroom also makes students more comfortable throughout the lengthy school day which is highly correlated with better learning techniques.

Kay-Twelve's 3-Step Game Plan:

Are you ready to create your new collaborative space? Get ahold of a Kay-Twelve expert who understands the challenges you may face in making your school the best it can be. We're looking forward to providing you with the furniture you need to create the school your students and teachers deserve!

CONSULTATION

Schedule a free consultation with one of our experts so we understand exactly the environment you want to create.

CUSTOMIZE

Get a custom game plan based on your goals with steps to turn your school into a cutting-edge, collaborative learning environment.

CREATE

We'll deliver and train you how to use your furniture to create engaging, collaborative environments for your school.
