

ACOUSTICAL PANELS

Creating an environment where good communication can occur is important for any classroom or place of learning. When classroom acoustics are poor, important messages can get lost due to sound interference. By reducing noise and reverberation in spaces used for community buildings, classrooms, and places of worship we can minimize that issue.

APPLICATIONS

- Classroom and Offices
- Healthcare Facilities and Hospitals
- Restaurants
- Churches

FEATURES

- Class 1 Fire Rated
- NRC Ratings .85–1.15
- 6–7 lbs. per cubic ft. density

OPTIONS

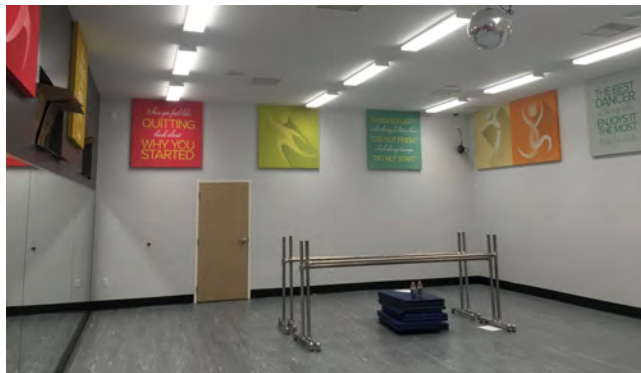

- 1" or 2" Thickness
- 24 Fabric colors
- Custom sizing up to 4' x 10'
