SETTING UP YOUR WATER FILTER DECANTER

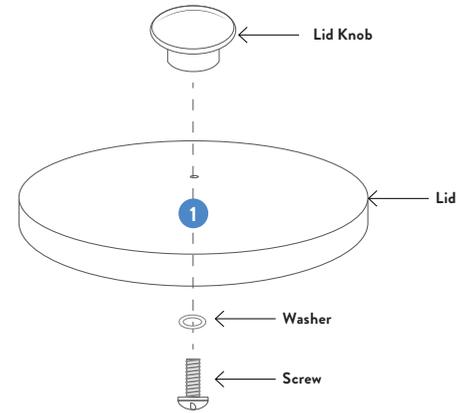

Please use care when handling the filter. Avoid dropping, dragging or setting it on a sharp surface.

STEP ONE

Rinse the Solid Carbon Block Filter under cold water for one minute to remove any loose particles.

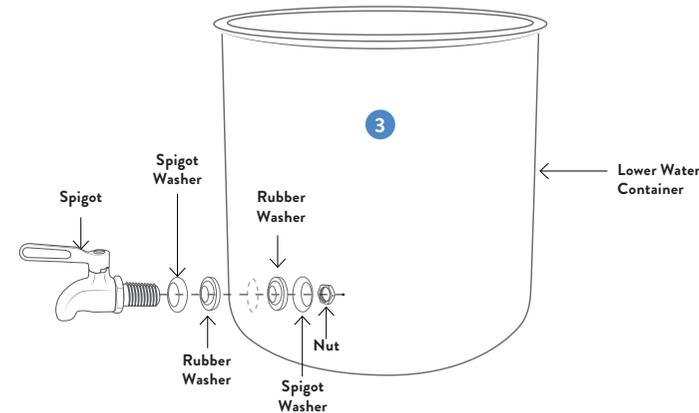

STEP TWO

- Slip the washer onto the screw and insert the top of the screw through the hole in the lid.
- Hand-tighten the knob onto the screw.

STEP THREE

- Remove nut from spigot.
- Remove protective film from the spigot washers and place one spigot washer and one rubber washer on the spigot, as shown below.
- Insert the spigot through the hole in the lower water container, and secure it with the other rubber washer, spigot washer and nut.
- Hold the nut in place and tighten by turning the spigot clockwise until it's in an upright position.
- Hand-tighten the nut onto the spigot until it creates a seal (3–5 turns). Spigot washer(s) may not be flush to unit.

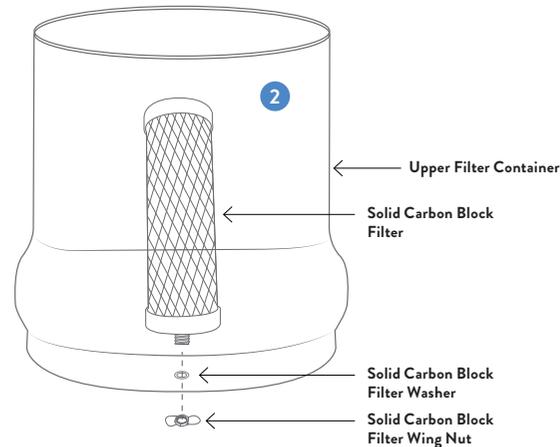

STEP FOUR

NOTE: The Solid Carbon Block Filter comes with hardware already assembled.

Remove the washer and wing nut from the Solid Carbon Block Filter. Place the filter stem through the hole in the upper filter container. Secure using the filter washer and wing nut.

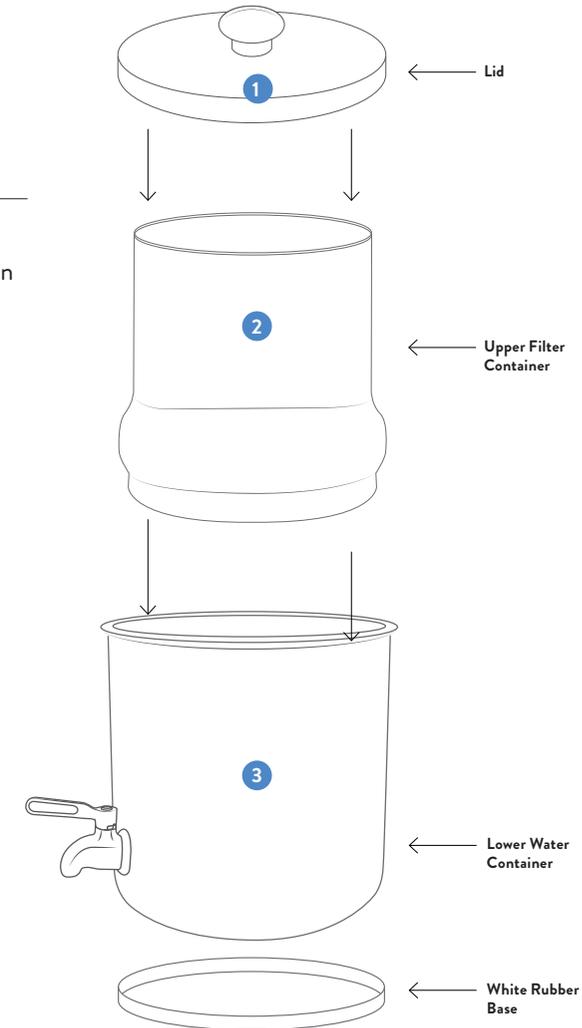

Do not over tighten.

STEP FIVE

Place the upper filter container with the installed filter securely on top of the lower water container. Place the assembled water filter decanter into the rubber base.

Your new water filter decanter is now ready to fill.

STEP SIX

- Make sure the spigot is in the off position (the handle is turned to the side) until you're ready to dispense your water.
- Fill the upper container with water and allow it to filter into the lower water container. The initial fill needs to fully saturate the filter with water.
- Since fine particles of carbon may flush from the filter initially, please discard the water and then refill and discard a second time. (Please note that it may take more than an hour for each round of water to flow through the filter.)
- After the second batch of water has run through the filter, empty the lower water container.
- Refill the upper filter container, and your water is ready to drink.

IMPORTANT

- DO NOT** place decanter in the dishwasher.
- DO NOT** clean purification elements with detergents or soaps.
- Refer to the full owner's manual online for cleaning, maintenance and troubleshooting guidelines.

WARNING!

Use only with tap water or other potable water source. Please see the owner's manual or material accompanying the Solid Carbon Block Filter for information concerning filtration capabilities.

The full owner's manual for your Pure Company Water Filter Decanter and its warranty information are available online at thepurecompany.com/support.
