

ADRENAL SUPPORT HERBAL REMEDY

PRODUCT DESCRIPTION

Adrenal Support for Cushing's Relief is a 100% herbal remedy specifically formulated to provide comprehensive, natural support to dogs & cats suffering from symptoms of Cushing's disease. Hormonal balance is a delicate and complex issue that must be approached holistically for long-term success.

Adrenal Support for Cushing's Relief is a truly holistic approach to Cushing's disease, serving to restore balance in the entire HPA (hypothalamic, pituitary, adrenal) axis, rather than just suppressing symptoms. The tonic, adaptogenic herbs present in Adrenal Support for Cushing's Relief serve to gently and safely restore healthy adrenal function while reducing unpleasant symptoms over time. Cushing's Relief Adrenal Support is also well tolerated without side effects, unlike other approaches.

Cushing's disease, or hyperadrenocorticism, refers to a condition when the body produces too much of the stress hormone called cortisol. The production of this hormone takes place in two small glands above the kidneys, called adrenal glands. In times of stress, the adrenal glands release cortisol, also known as the "fight-or-flight" hormone. This is a healthy survival mechanism that serves animals well when faced with dangerous situations in the wild. However, when stress is chronic, cortisol is released in excessive amounts that can be devastating to an animal's health.

Whether it's regular trips to the vet's office, conflicts with other pets or daily visits from the mail carrier, stress can be a very real problem for many pets. High strung, nervous pets often exhibit greater amounts of chronic stress that can contribute to the development of Cushing's disease over time. Animals suffering from this condition exhibit a range of negative symptoms such as increased appetite, panting, skin problems, thinning fur, elevated blood sugar, low energy levels, a "pot belly," and increased thirst or urination. While chemical treatments for these symptoms do exist, long-term use does come with a number of potential side effects and health risks.

DIRECTIONS

Use 2-3 times daily. Drops may be administered directly into the mouth, or mixed with food.

Cats and dogs under 20 lbs: 3-5 drops

Dogs 20-50 lbs: 6-8 drops

Dogs over 50 lbs: 10 drops

Each bottle of Cushing's Relief contains 2 FL OZ (59mL), Minimum 2000 drops

INGREDIENTS

Cushing's Relief Adrenal Support contains a proprietary blend of the following herbs in a therapeutic dosage:

Ashwagandha (*Withania somnifera*) has been used for centuries in Ayurvedic medicine to strengthen the body and improve overall health. Ashwagandha is known to improve the body's response to environmental stress with daily use, while enhancing energy levels and immune function. Ashwagandha has also been studied for its ability to protect and support healthy liver function.

Astragalus (*Astragalus membranaceus*) has been used for centuries in Traditional Chinese Medicine to bring strength, energy and vitality. Astragalus is considered a tonic adaptogen due to its strengthening and balancing influence on the adrenal glands when used regularly. Astragalus traditionally helped relieve excessive thirst and urination. As an added benefit, Astragalus helps stimulate the immune system.

Burdock (*Arctium lappa*) serves to nourish the liver, which is often overburdened in cases of Cushing's disease. Burdock is consumed traditionally as a vegetable with great nutritional value and blood-purifying properties. Burdock has also been used to help relieve symptoms of skin disorders such as dryness, irritation, scaliness and irritation.

Cleavers (*Galium aparine*) is a cleansing herb which has been used traditionally to benefit the kidneys and adrenal glands. Cleavers contains a wide range of vitamins, minerals and nutrients that support the health of the mucosal membranes of the skin. Herbalists often prescribe Cleavers tea for its ability to relieve symptoms of skin disorders.

Dandelion (*Taraxacum officinale*) is a gentle, food grade herb traditionally used to nourish the liver, kidneys, adrenal glands and entire digestive tract. Dandelion contains a range of vitamins, minerals and sterols which specifically benefit the adrenal glands and encourage their healthy function. Dandelion also contains nutrients known to benefit the healthy growth of skin and hair.

Eleuthero (*Eleutherococcus senticosus*) is a tonic adaptogen that is used to enhance adrenal health. Eleuthero is known to improve the body's resilience to stress, which is a primary contributing factor to the development of Cushing's disease. Adaptogenic herbs serve to optimize the function the HPA (hypothalamic-pituitary-adrenal) axis and thus provide great benefit to animals suffering from symptoms of Cushing's disease.

Ginseng (*Panax ginseng*) has been used for millennia in Traditional Chinese Medicine to support vibrant, lasting health. Ginseng is considered to be one of the best adaptogenic herbs available, and it has been studied extensively for its benefits on the HPA (hypothalamic-pituitary-adrenal) axis. Ginseng offers support of healthy energy levels, muscle strength, stamina and healthy blood sugar levels with consistent use.

Horsetail (*Equisetum arvense*) contains a variety of minerals such as silica, potassium, manganese, magnesium, sulphur and calcium.

Silica is utilized in the formation of skin, hair and connective tissue. Adequate amounts of silica ensure soft, healthy skin and a full coat of fur. The diversity of minerals present in Horsetail can benefit hormonal balance, digestive health and the nervous system.

Licorice (*Glycyrrhiza glabra*) is a very important herb in Traditional Chinese Medicine, offering a wide range of health benefits. Licorice is often prescribed by herbalists to help balance adrenal function when cortisol levels are elevated, making it an ideal candidate for animal's suffering from Cushing's disease. Licorice also benefits the liver, skin and immune system.

Inactive ingredients: Purified Water, USP Cane Ethanol Alcohol 20%, USP Vegetable Glycerin.
