

GOOD DIGESTION FORMULA HERBAL SOLUTION

PRODUCT DESCRIPTION

Good Digestion Formula is a 100% herbal formula designed to promote healthy digestion in pets on a daily, ongoing basis. Good Digestion Formula contains a premium blend of high quality herbs that not only relieve symptoms of indigestion, but also promote digestive health long term. Good Digestion Formula can be administered to animals suffering from poor appetite, constipation, nausea, gas, bloating, acid reflux and other symptoms of indigestion. Good Digestion Formula may also be administered to healthy animals for maintenance support of ongoing digestive health.

Proper digestion is absolutely essential to longevity, healthy energy levels and overall vitality, both in humans and pets. Unfortunately, poor diet, stress and other factors can contribute to impaired or sluggish digestion, along with a host of unpleasant symptoms. Many commercial dry foods can be difficult for cats and dogs to digest, causing inflammation and poor digestion over time. Constipation, gas, bloating, reduced appetite and abdominal pains are fairly common, especially in older pets whose digestion tends to weaken with age.

In addition to supplying a healthful, biologically appropriate diet, plants found in nature can provide the body with much-needed digestive support. Warming herbs like Ginger help to stimulate digestion, while soothing herbs like Marshmallow and Slippery Elm provide calming relief of pain and inflammation. Mixing these gentle, digestive herbs in with food is an easy, convenient way to ensure a long, healthy life in cats and dogs.

DIRECTIONS

Use 2-3 times daily. Drops may be administered directly into the mouth, or mixed with food.

Cats and dogs under 20 lbs: 2-4 drops

Dogs 20-50 lbs: 5-7 drops

Dogs over 50 lbs: 8-10 drops

Product size: 2 FL OZ (59mL), Minimum 2000 drops

INGREDIENTS

Good Digestion Formula contains a proprietary blend of the following herbs in a therapeutic dosage:

Alfalfa Leaf (*Medicago sativa*) is a nourishing, food grade herb that promotes healthy digestive function. Herbalists would traditionally prescribe daily consumption of Alfalfa to help with poor appetite and indigestion. Alfalfa contains digestive enzymes, vitamins and minerals that help reduce inflammation in the GI tract, gas and other symptoms of digestive distress.

Buckthorn Bark (*Rhamnus frangula*) is a gentle tonic herb that promotes digestion and relieves constipation. Also called Alder Buckthorn, the bark of this tree was traditionally prescribed in Western Herbalism to help move along the digestive process when sluggish or constipated.

Cinchona (*Cinchona officinalis*) originates from the Andes of South America and is used to promote healthy digestion. The bark of the Cinchona tree has been used to strengthen stomach function when weak or feeble, while relieving bloating and cramps.

Ginger (*Zingiber officinale*) is one of the world's best digestive herbs. Traditional Chinese Medicine hails Ginger as a very effective remedy for indigestion symptoms such as nausea, gas, bloating, hyperacidity, poor appetite, sluggish digestion and excessive belching. The warming nature of this herb helps to gently stimulate the digestive process. Ginger also possesses pain-relieving and anti-inflammatory properties.

Licorice Root (*Glycyrrhiza glabra*) is an ancient remedy that benefits digestion in many ways. Licorice has been used to reduce inflammation in the stomach and GI tract, as in cases of gastritis and ulcers. The soothing action of Licorice also helps to control spasms in the GI tract and reduce abdominal pain.

Marshmallow Root (*Althaea officinalis*) is a soothing, mucilaginous herb that can be helpful in cases of heartburn, acid reflux, ulcers, inflammation in the GI tract and other symptoms of indigestion. The mucilage present in Marshmallow root coats the delicate membranes of the GI tract, promoting the healing of inflamed or damaged tissue.

Milk Thistle Seed (*Silybum marianum*) promotes healthy liver function and digestion. Milk Thistle is known to increase bile production, while stimulating the production of enzymes, thus aiding healthy digestion. Milk Thistle also possesses anti-inflammatory properties that can be helpful in soothing digestive discomfort.

Slippery Elm Bark (*Ulmus rubra*) comes from the Elm family of trees and is typically found growing in North America. Slippery Elm contains mucilage which is useful in soothing irritation or inflammation in the gastrointestinal tract. Slippery Elm can provide significant pain relief in cases of digestive discomfort, while promoting healing of damaged or inflamed tissue.

Inactive ingredients are Purified Water, USP Cane Ethanol Alcohol 20%, USP Vegetable Glycerin.
