

KIDNEY HEALTH SUPPORT HERBAL SOLUTION

PRODUCT DESCRIPTION

Kidney Health Support is a 100% herbal formula that contains a premium blend of kidney supportive herbs from East and West. The herbs in Kidney Health Support are gentle enough to administer to healthy animals for maintenance and preventative purposes, and can also benefit pets suffering from kidney problems. If kidney disease is present, it is often best to keep the attending veterinarian apprised of any herbs being used alongside conventional treatments. Kidney Health Support offers a wide range of benefits, from cleansing the urinary tract to reducing inflammation and other symptoms of inflammation and disease in the kidneys.

The kidneys play a very important role in preserving health and vitality. When functioning properly, the kidneys are central in helping the body to eliminate waste products, producing several important hormones, maintaining proper pH levels in the blood, regulating the balance of body fluids and sustaining overall health and vitality. When kidney health suffers, other organs suffer as well and health tends to decline over time.

Fortunately, herbalists have discovered many herbs over the centuries that serve to protect, preserve and even improve kidney function with regular use. Simply mixing these healing plants in the proper dosage with an animal's food each day can provide noticeable benefits to healthy animals, as well as animals with reduced kidney function. The important key is to administer the appropriate combination of herbs, in the correct proportions and optimal dosage for enhanced therapeutic value and long-term safety.

DIRECTIONS

Use 2-3 times daily. Drops may be administered directly into the mouth, or mixed with food.

Cats and dogs under 20 lbs: 2-4 drops

Dogs 20-50 lbs: 5-7 drops

Dogs over 50 lbs: 8-10 drops

Each bottle of Kidney Health Support contains 2 FL OZ (59mL), Minimum 2000 drops

INGREDIENTS

Buchu Leaf (*Barosma Betulina*) is a gentle anti-inflammatory, kidney supportive herb. Buchu contains volatile oils such as limonene, menthone and pulegone, along with flavonoids, B vitamins, and mucilage. Buchu was traditionally used to address inflammation and disease in the kidneys and urinary tract.

Burdock Root (*Articum lappa*) is a gentle, food grade herb that is used to promote healthy kidney function. The therapeutic use of Burdock helps to regulate blood pressure and fluid balance in the body, while inhibiting protein leakage and other symptoms of kidney dysfunction.

Cleavers (*Galium aparine*) has long been regarded by herbalists as an excellent kidney tonic. The gentle cleansing action of Cleavers makes it an excellent candidate for supporting the kidneys safely and without the risk of negative side effects. Cleavers also helps to regulate blood pressure and fluid balance throughout the body.

Corn silk (*Zea mays*) is consumed throughout Asia for its cooling, cleansing properties. Corn silk benefits the kidneys and urinary tract, and is also used to promote healthy blood pressure. Corn silk is believed to provide anti-bacterial, anti-inflammatory and antioxidant benefits.

Couch Grass (*Triticum repens*) has been used for thousands of years to cleanse and promote the health of the urinary tract and kidneys, especially in the case of kidney stones and other related inflammatory disorders. In addition to supporting the kidneys, Couch Grass is believed to benefit liver health.

Dandelion Root (*Taraxacum officinale*) is a nutritive, cleansing and diuretic herb that is commonly found growing throughout the backyards of North America. Dandelion is used to help the body eliminate waste and toxins through the kidneys, while inhibiting the growth of pathogenic bacteria in the urinary tract.

Goldenrod (*Solidago Virgaurea*) has been used extensively in Western Herbalism to help the body excrete excess fluid, while promoting healthy kidney function. Goldenrod has also been effective in relieving inflammation and other related symptoms of kidney dysfunction.

Horsetail (*Equisetum arvense*) is a nutritive, kidney supportive herb that helps to regulate fluid balance in the body, making it an excellent choice for pets with weak or compromised kidney function. Horsetail also possesses anti-inflammatory and antioxidant properties.

Hydrangea Root (*Hydrangea arborescence*) is typically used to normalize water-salt metabolism, while promoting healthy waste removal via the kidneys. The cleansing properties of Hydrangea Root serve to keep the urinary organs and kidneys functioning properly with reduced occurrence of inflammation.

Plantain Leaf (*Plantago major*) is used to assist the body in eliminating excess uric acid and other wastes. Regular use of Plantain Leaf is said to strengthen and improve kidney function.

Wild Yam (*Dioscorea villosa*)

Inactive ingredients are Purified Water, USP Cane Ethanol Alcohol 20%, USP Vegetable Glycerin.
