NOTE:

Not all private health funds offer a rebate for Orthosis; Orthopaedic appliances; and Abdominal binders/external technical aids.

Belly Bandit® is a post-natal belly wrap designed specifically to assist with

1. **Diastasis Recti**
abdominal muscle separation, common condition in Australian mums
2. **Fluid retention**
the pressure provided by the Belly Bandit® will assist in the removal of retained water, which is prevalent in mum following child birth
3. **Post-natal injury support**
the Belly Bandit® will assist mum in protecting her back from a secondary injury as a result of long periods of time hunched over feeding either breast or with a bottle, Belly Bandit® will support mums back
4. **Lower back and leg support**
by being wrapped around mum's tummy the Belly Bandit® will take some pressure and weight off her lower back and legs by supporting her core.
