PRODUCT CATALOGUE

## An introduction...

Hexton Bee Company team is excited for what the future holds, and despite the challenges that have been thrown at us over the last couple of years due to the pandemic, we aim to continue growing our passion, our product range, our audience, and our people.

Hexton Bee Company started with a few hives and an interest in how we can work with nature to create products that are beautiful and make a difference. Our love story grew as we discovered more and more ways we could incorporate these products into our lives and more importantly, use them to replace the use of toxins and chemicals that are found in so many products today.

We like to see our work as a collaboration with our bees to create amazing products that will truly make a difference.

Our brand is going from strength to strength within our four main areas;  
Our Raw NZ Honey and our Manuka Honey range, bottled in recyclable glass jars.  
Our 100% pure Beeswax candles range.  
Our natural, soothing and healing Balm Range  
Our reusable and eco-friendly Beeswax Food Wrap range.

Through our loyal retailers, corporate clients and online store, we continue to find new and innovative ways to raise awareness of our natural and healthy range of NZ made products whilst remaining sustainable and working to reduce our carbon footprint.

# Beekeeping

Our family of beekeepers are passionate and innovative individuals who continually strive for excellence. We care about improving bee health and improving the bee population.

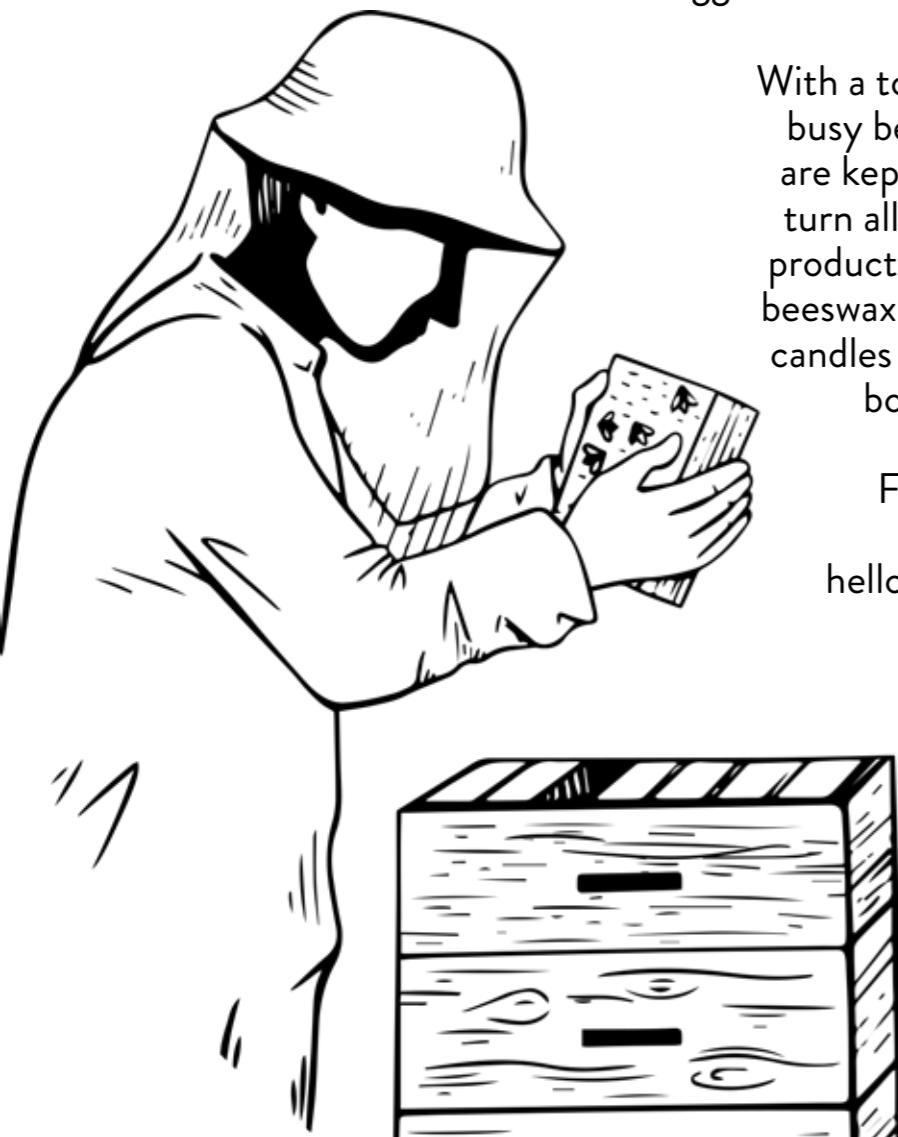

As beekeepers, we have a great respect for these beautiful creatures and the way they work seamlessly with nature to produce totally natural products.

We are committed to sustainability. We maintain full control over our products, right from the beehives themselves, through the extraction process and then the manufacturing & dispatch of all of our products.

Our hives are based around New Zealand - from the sunny coast of Gisborne to the rugged Tararua Ranges.

With a total of 4000 hives and countless busy bees, our team of 10 beekeepers are kept busy working with the bees to turn all their hard work into wonderful products to benefit everyone. Using the beeswax from our hives for pure beeswax candles and amazing beeswax wraps and bottling the delicious honey.

For bulk honey or beeswax enquiries, email [hello@hextonbeecompany.co.nz](mailto:hello@hextonbeecompany.co.nz)

From our hives to your home.

# Beeswax Candles

All Hexton Bee Company beeswax candles are made from 100% pure beeswax from our own sustainably managed hives. They are hand poured or hand rolled in small batches and finished with a cotton wick that contains no lead or metals.

Beeswax candles burn brighter and cleaner than any other wax candles and burn up to 3 times longer! This is because beeswax has a high melting point, meaning they are dripless in a draft free area. Beeswax is also naturally scented by the nectar from many different flowers that are visited by the bees giving off a subtle honey aroma.

Unlike other beeswax candles available, our candles are made with 100% pure beeswax. It is the purest and most natural of all waxes (including vegetable waxes) and has the least amount of processing and no additives! Our natural beeswax candles contain no artificial scents or colours and emit negative ions into the air. These bond with toxins in your home (such as dust, dirt, toxins which carry a positive charge) and help to clean the air, purifying it of dust, odours, pollens, toxins & mould as well as elevating your mood. Not only are these candles so much better than their toxic alternatives, but they also help to remove other toxins from our environment. They can be a great benefit for anyone with allergies or asthma.  
Simply burn for 2 - 3 hours each night

*NB: Don't be fooled by candles that don't state they are 100% beeswax. You only need 51% beeswax in a candle to call it a beeswax candle. Always go for candle stating 100% pure beeswax to gain the full benefit of beeswax candles.*

# Beeswax Wraps

Hexton Bee Company Beeswax Food Wraps are a totally natural alternative to single-use traditional cling-wrap.

Handmade with all natural ingredients including 100% cotton, pure NZ beeswax from our own sustainably managed hives, tree resin and jojoba oil, the wraps are naturally antibacterial and will allow your food to breathe, unlike plastic.

Use our reusable beeswax wraps to cover foods such as fresh fruit and vegetables, cheeses and herbs. They are excellent for covering bowls, leftovers or storing snacks and sandwiches.

Not only do beeswax wraps replace the use of plastic, they also help in preventing food wastage as they extend the life of food dramatically. Try wrapping half an avocado to prove it, they can last up to a week in a beeswax food wrap.

To wash, simply wipe clean with a clean cloth or rinse with cold water and eco-friendly soap if necessary.

Avoid using hot water as this can cause the coating to melt and reduce the wraps effectiveness.

Hexton Bee Company Beeswax Wraps last around 1 year depending on usage and are easily compostable once you have finished.

Hexton Bee Company Wrap Sizes:

- Small - 20cm x 20cm
- Medium - 26cm x 30cm
- Large - 35cm x 35cm
- X-Large - 45cm x 40cm

Wrap Display Stand:

Medium (18 wraps)

## FURNITURE PROTECTOR

100% Natural Furniture protector and polish

Furniture Protector  
80g  
FP80

Our Furniture Protector is a natural beeswax conditioner, ideal for use on furniture, wood, leather and more.

It is an earth friendly, non-toxic and environmentally safe balm that is made with all natural ingredients.

It renews, moisturises and protects furniture and other natural wood products such as chopping boards, and this conditioner is also ideal for leather products too,

Apply with a soft cloth and work into wood or leather. Buff to a natural sheen leaving a lovely fresh scent.

## PROPOLIS EXTRACT

100% New Zealand Propolis

Propolis Extract  
25ml  
PE25

Our Propolis Extract contains highest quality New Zealand 30% propolis tincture (ethanol base).

Propolis is a natural resin found in the young buds of trees. Propolis is an extremely effective preventative for illness as it is very high in flavonoids. This makes it anti-bacterial, anti-fungal, anti-microbial and anti-oxidant. This is beneficial to your immune system and supports oral health.

Put a few drops, about 1ml into a small amount of water to gargle if you have a sore throat and drink to build immunity. Apply it to sores and infections on the skin. Apply to cuts, sores, fungal infections, pimples, acne, and cold sores. Dilute for sensitive skin.

## BEESWAX BLOCKS

100% New Zealand Beeswax from our sustainably managed hives.

Beeswax Block

## MANUKA HONEY

This special honey is carefully crafted by our busy bees using the nectar of the native New Zealand Manuka flower.

Every jar of Hexton Bee Company Manuka Honey has come from the untouched remote New Zealand countryside, and can be traced right back to the hive location and the beekeeper who looked after the busy bees. It has been carefully extracted from the frames, tested, packaged and sealed by the Hexton Bee team in Gisborne, New Zealand. Not all Manuka honey is created equal. The MGO number tells you how much Methylglyoxal is in your jar of honey.

Manuka honey can be used in plenty of different ways - eat it by the spoonful, sweeten your hot drinks & smoothies or simply spread it on your toast each morning.

It also is a wonderful hydrating natural product to use for skincare. Apply to wounds or broken skin and this powerful and antibacterial honey has a soothing action and enhances the skins natural healing process.

## MANUKA NPA 5+ | MGO 80+

300g M530 | 500g M550

**Hive Location:**  
Te Araroa, NZ.

**Beekeeper:**  
Yasuo

This creamy textured golden honey is gathered from the Te Araroa region of NZ. It has a sweet mild taste with tangy toffee notes, unique to manuka honey.

Can be used as a marinade for ham and chicken or pair with ice cream and desserts.

## MANUKA NPA 10+ | MGO 250+

300g M1030 | 500g M1050

**Hive Location:**  
Taranua, NZ.

**Beekeeper:**  
Martin

With nectar gathered from the native manuka from the rugged Taranua ranges of NZ, this honey has notes of dark caramel, praline and nougat. With all the unique properties and benefits of manuka honey, this honey can also be paired with cream desserts, or roasted nuts.

## MANUKA NPA 15+ | MGO 500+

300g M1530 | 500g M1550

**Hive Location:**  
Taihape, NZ.

**Beekeeper:**  
Martin

The nectar for this honey is gathered from the harsh high altitude ranges in the Taihape region of NZ. Its high MGO content gives it the bittersweet flavour with slight salty aftertaste.

Use with tea or make a syrup mixed with ginger, juice and lemon. Can be used with vegetables, meats, cheeses and wines.

## MULTIFLORAL HONEY

300g MUL300 | 500g MUL500

**Hive Location:**  
Rere, NZ.

**Beekeeper:**  
Warren

This comfortable flavour of multifloral honey is what we remember from our youth. Creamy, golden, and velvety, this is the perfect honey for almost everything.

Spread on sourdough toast, muffins, cakes and scones or as a natural sweetener in baking.

## CITRUS HONEY LIMITED EDITION

300g CIT300 | 500g CIT500

**Hive Location:**  
Gisborne, NZ.

**Beekeeper:**  
Owen

This Citrus Honey is light and refreshing with a beautiful citrus scent. Gathered by our bees from the spring blossoms of citrus trees around the Manutuke region of Gisborne, NZ. This honey will sweeten your morning and uplift your spirits.

Pair with your favorite herbal tea or breakfast.

## TAWARI HONEY

300g TAW300 | 500g TAW500

**Hive Location:**  
Matawai, NZ.

**Beekeeper:**  
Mita

With nectar gathered from the Tawari flower in the high altitude Matawai region, this honey has all the earthy, rich overtones you would expect, but with notes of lavender, butterscotch and dark berries.

This honey is great paired with fruit and autumn produce.

## KANUKA HONEY

300g KAN300 | 500g KAN500

**Hive Location:**  
Waipiro Bay, NZ.

**Beekeeper:**  
Mita

Kanuka honey has a very unique taste and flavour, that can only come from our native kanuka trees. Hints of brulee, strong whisky, butterscotch or stout with a lingering aftertaste of sweet caramel.

Gives depth of flavour to many ingredients and great in a lemon and honey drink.

## REWAREWA HONEY

300g REW300 | 500g REW500

**Hive Location:**  
Te Puia, NZ.

**Beekeeper:**  
Peitro

This Rewarewa Honey has a rich and caramel native flavour with earthy tones. Gathered by our bees from the rugged hills of Te Puia. This honey is full bodied and amber in appearance.

Use as a natural sweetener or drizzle on your morning porridge or waffles.

# Our Story

At Hexton Bee Company we see our products as a natural collaboration between people and bees, using the fruits of our hives to create products that contribute to overall wellness for all.

The Hexton Bee Company Team  
Gisborne, New Zealand.

*"In a modern world where everything is mass produced, we like to slow down and create each of our products by hand, one at a time."*

25 years ago, our founder Martin had his first glimpse into his Uncle's beehive. It was to be the start of a long and interesting journey of discovering what these amazing animals have to offer.

Along the way more and more of his family have been inspired to follow in his journey, creating a true family team working together to bring the work of our bees from our hives to your home.

Our family values are reflected in all of our work as we seek to improve our own lives and those of others through what nature has provided.

Now with a team of 10 people, we are continually researching and trialing new ways we can incorporate the fruits of our hives - the incredible gift of nature - into our every day lives to enhance our lives through what comes naturally.

We look forward to continuing this journey with you.
