

Features:

- AISI 316L INOX Stainless Steel Cylinder
Treated using our pickling & passivation process which increases corrosion resistance 5x more than a standard stainless cylinder!
- Works with Heat Pumps, Solar, Biomass/Gas/Oil & Electric Boilers
- Slimline - Only 550mm diameter
- Tested in accordance with EN12897
- Extremely fast reheat recovery time due to the superior 32mm stainless coils
- Solar Thermal and PV Diverter compatible
- High density insulation = Low heat loss
- High performance at low water pressures
- Easy access service hatch at the front for internal cleaning & maintenance
- Supplementary electric heating element (3000W)
- Adjustable Levelling feet
- Carry handles for easy transport & installation
- Seamless low temperature plasma welding
- Optional Electronic Anode Protection with led status
- Optional Additional 3kW Element
- Compliant with G3, KIWA Watertec, KIWA Building regulations and CE approved
- G3 Kit Included - (Expansion Vessel, Combi Valve & Tundish)
- 25 year warranty
see warranty terms and conditions

Easy inspection. Low maintenance.

Unique to all the cylinders is the large inspection/service hatch. Cleaning and flushing of limescale deposits couldn't be easier. By removing a single nut, the entire inspection hatch is removed to give access to the inner tank.

Invented Hot Water
