

## Model No: CE-WFH

## Wood Fired Water Heater

“Wood-fired” storage water heaters are designed to produce water where traditional sources of energy are unavailable or simply to use renewable forms of energy while respecting the environment.

### FEATURES:

- Steel tank, glass-lined “Blue Glass 4753” using flow-coating method 850°C, WRAS (BS6920-1) certified
- Corrosion-proof magnesium anode
- Combustion chamber made of refractory material with pull-out ash collecting device
- Enamelled sheet metal external combustion chamber coating
- Mineral wool insulation layer for reduced heat loss
- Armoured copper heating element, regulation and safety rod thermostat (wood-electric version only)
- External casing made of sheet metal coated with epoxy powder paint
- Stored water temperature indicator
- 3 Year Warranty

\*See warranty terms and conditions

### Environmentally friendly

We strive to optimize its industrial activity while respecting the environment. To minimize the environmental impact of its products, it has abolished the use of chlorofluorocarbons (CFC-HCFC) in the insulation layer and makes continuous efforts to use recyclable components

### Magnesium anode

Featured in all the models in the range, this anode makes for effective electrochemical tank protection.

### SPECIFICATIONS:

MODEL	CE-WFH
Capacity	80
Warranty	3 Years
Power	1.2 kW
Voltage	230v
Heating Time ( $\Delta T_{50} \text{ }^{\circ}\text{C}$ )	245 Mins
Max. operating temperature	90°C
Max. operating pressure	0.8 MPa
Net weight	46 Kg
Hydraulic connections (KW-WW)	1/2" G
