

WHOLE HOUSE FILTER SYSTEMS - for clean healthy water to every tap in your home

HOW OUR WHOLE-HOUSE WATER PURIFIERS WORK

The whole-house water purifier is plumbed in at the mains point of entry to your home. The twin system pre-filter and carbon/KDF unit filters out dirt and sediment as well as reduces heavy metals, chemicals, chlorine, harmful pesticides, herbicides, taste and odour. The system filters all incoming water before it enters your home which means every single outlet from the kitchen to the shower and washing machine is using clean, safe and healthy water.

No more chlorine or chemical taste from your town water supply.

Water is not only for drinking, but bathing as well. For sufferers of sensitive skin filtered water can be restorative - reducing irritation. Great for indoor and outdoor plants. Protects your home as well as your family!

HOW?

- KDF Process Media contain no chemicals and are 100% recyclable
- Remove chlorine, iron, hydrogen sulfide and heavy metals from water
- Control scale, bacteria and algae
- Extend the life and improve the performance of GAC, Granular Activated Carbon
- Reduced material requirements result in more compact and more economical water treatment systems
- The 20 micron pre filter will remove sediment and dirt to help minimise damage to your ceramic and standard valved tap ware, removing small particles that can affect the dishwasher and washing machine filters, your shower head and the valving in your hot water cylinder and plumbing system.

ACTIVATED CARBON FILTERS REDUCE:

Amyl Acetate	Dyes	Nitrobenzene
Amyl Alcohol	Ethyl Acetate	Nitrotoluene
Benzene	Ethyl Acrylate	Odours (general)
Bleach	Gasoline	Oil - Dissolved
Butyl Alcohol	Glycols	Organic Esters
Butyl Acetate	Herbicides	Oxalic Acid
Calcium Hypochlorite	Hydrogen Peroxide	PCB's
Chloral	Hypochlorous Acid	Pesticides
Chloroform	Insecticides	Phenol
Chlorine	Iodine	Plastic Taste
Chlorobenzene	Isopropyl Alcohol	Sodium Hypochlorite
Chlorophenol	Isopropyl Acetate	... and more!!
Cresol	Ketones	
Difolants	Methyl Bromide	
Diesel Fuel	Methyl Ethyl Ketone
