

## Green Gone Concentrate 5 Ltr

- Kills & controls green algae, mould & lichen
- Effective Path & Patio cleaner
- Spray & leave... Its that easy!
- No pressure washing...no scrubbing...no rinsing
- Effective for up to 9 months
- No acids or bleach
- Treats up to 250 sq mtrs

### The product

The appearance of green algae/lichen on property substrates and in a garden environment is generally viewed as unsightly, it can also be potentially dangerous on pathways/walkways due to its slippery characteristics. The effectiveness and ease of application of Green Gone! has the great attraction in that no physical work is required i.e scrubbing, brushing, pressure washing or rinsing in order to achieve the removal of green algae/Lichen from all types of hard surfaces... just apply to the area and leave ....the result will be visible within 36 hours and it protects against re-growth for up to 9 months!.

### Where to use

All hard outdoor surfaces such as paved areas, patio's, driveways, block pavers, fencing, decking, steps, sheds, glass, UPVC windows, greenhouses, perspex, garden furniture, walls, roofs, terracotta pots in fact any surface that will allow green algae/lichen to grow.

### How to use

Dilute 1 litre of product in 9 litres of clean water. Apply 1 litre of product per 2.5 - 5 square metres by watering can, garden sprayer, brush or sweeping brush depending on area to be treated. For area's of heavy growth dilute 1 litre of product in 4 litres of water. Whilst this product is designed to be safe to use on most 'water safe' surfaces we recommend that you test on a small inconspicuous area if unsure.

Note : Ensure any debris such as leaves, twigs, loose soil or weeds are removed from surfaces to be treated prior to application. After applying leave for 1 – 3 days and green growth will slowly disappear (in a similar manner to the way weed killers work). On heavily soiled surfaces a second application may be required. Apply to dry surfaces, do not apply if rain is expected within 4 hours.

### Children and Pets

Need not be excluded from the treated area once dry.

### Coverage

5 Litres of concentrate sufficient to treat up to 250 sq.mt .

### Contains

Benzalkonium Chloride 5.0%w/w

### Contents

5 Litres Concentrate

HSE No 9574
