

DESCRIPTION

Many walls, roofs, pathways and drives are contaminated by organic growth (lichen, moss etc), dirt and grime, especially on north elevations and near trees. The removal of this organic growth, dirt and grime without affecting the stone, slate, render or brickwork enhances the appearance of the property. Organic growth on paths, walkways, forecourts and patios causes slippery surfaces which can be a danger to residents, particularly the elderly.

Platinum Moss & Algae Cleaner is a specially formulated concentrated blend of powerful detergents and cleaners for removing surface organic growth, dirt and grime from most surfaces, enclosed within a water soluble sachet.

KEY BENEFITS

- Environmentally friendly technology
- Solvent free technology with no volatility issues
- Non-hazardous fully biodegradable surfactants
- No exposure of operators to concentrate
- No deposits or stains on delicate surfaces
- Packaging can be disposed of in general refuse
- Significant reduction in plastic waste
- Significant reduction in paper waste
- Virtually no odour
- Non-flammable

APPLICATION AREAS

- For use on walking areas – paths, patios, driveways and forecourts
- For use on roofs – slates, tiles, shingles
- For use on walls – render, stone, brickwork
- For use on timber – fencing, gates, sheds

APPLICATION METHOD

Dilute 1 part concentrate with 4 parts water.

Apply to surface to be cleaned by watering can or by low volume spray.

Apply in dry conditions at a rate of approximately 3-6 sq metres per litre (this will vary depending on the porosity and condition of the substrate) and leave to take effect. Ensure any debris such as leaves, twigs, loose soil or weeds are removed from surfaces to be treated prior to application.

After applying simply leave for 1 to 3 days and the green growth will slowly disappear (similar to the way weed killers work).

On heavily soiled surfaces a second application may be required.

For extra thick layers of surface contaminants remove by scraping and brushing before application.

DO NOT APPLY IF RAIN IS IMMINENT OR EXPECTED WITHIN 6 HOURS.

PACKAGING

5 litre concentrate

HEALTH & SAFETY

Refer to Material Safety Data Sheet (MSDS) before using the product.

FORMULATION

Non-ionic surfactants <5%
Cationic Surfactants <10%
