

WoodGuard

TIMBER PRESERVATIVES

F/I DUAL PURPOSE

CONCENTRATE

MICRO-EMULSION FUNGICIDE & INSECTICIDE
FOR THE CONTROL OF WOOD ROTTING FUNGI & WOOD BORING INSECTS

ACTIVE

Woodguard F/I Dual Purpose contains the two fungicides Propiconazole, IPBC & synthetic pyrethroid insecticide Permethrin. The fungicides are effective against a wide range of wood rotting fungi (both wet rot and dry rot) and the insecticide is effective against all life stages of wood boring insects whilst the surfactant system used in the formulation promotes rapid absorption and deep penetration into timber.

PRODUCT

Woodguard F/I Dual Purpose supplied as a 500g concentrate requiring dilution with water to form a ready to use product. The formulation is based micro-emulsion technology to achieve the desired effect in a non solvent and VOC free based system. Its active ingredients are designed to give the maximum spectrum of biological activity against a wide range of wood rotting fungi and wood boring insects (specifically woodworm) including their larvae. It provides rapid absorption into the timber giving high levels of penetration. It has virtually no odour and can be applied either by brush or low pressure spray to give long lasting protection.

Woodguard F/I Dual Purpose has a HSE statutory 1-hour re-entry time.

Woodguard F/I Dual Purpose is cleared under the Governments Pesticide Safety Precaution scheme and under the Control of Pesticide Regulations 1986. HSE 10640

EFFECTIVE AGAINST

Wood rotting fungi and wood boring insects

PREPARATION

Timber to be treated should be sound (remove and replace any unsound timbers) and reasonably dry before treatment (although the surfactant system will allow penetration into wet timbers). Any paint, varnish or other surface coatings should be removed prior to application.

APPLICATION Apply by low pressure spray or by brush
Dilute 500g with 25L of clean water, apply at 250 - 333ml/m² (1L per 3 - 4m²)

DRYING TIME: Allow 1- 2 Hours depending on temperature, humidity and ventilation.

PACKAGING: 500g plastic container

CONTAINS: Propiconazole 10% w/w IPBC 10% w/w Permethrin 10.0%

SHELF LIFE: 2 years, protect from frost

BATS The active ingredient Pemethrin, IPBC & Propiconazole have been accepted by the nature Conservancy bodies as suitable for the treatment of roof voids where bats roost. However it is a legal requirement to notify the appropriate Nature Conservancy body prior to any treatment of roof spaces where bats have been identified. Treatment must not be carried out whilst bats are at roost.
